

CHAPTER II

REVIEW OF RELATED LITERATURE

This chapter presents three main points, which are: review of related studies, review of theoretical studies, and theoretical framework. Review of previous studies is a review of previous researches which closely related to the present research. Review of theoretical studies is a review of previous theories used in this present research. The last point is theoretical framework which depicts why and how this present research is carried out.

2.1 Review of the Previous Studies

Many studies pertaining to textbook analysis, Higher Order Thinking Skills (HOTS) analysis, and reading comprehension questions analysis are widely conducted. Here is the review of the previous related studies regarding those issues. The discussion focuses on seeing the differences between the previous studies and this present study.

2.1.1 Research on Textbook

First thing first is the discussion of research on textbook. Islam (2013) analyzed English textbooks for 9th and 10th grade viewed from teachers' perspectives focusing on six aspects, such as, attractiveness of the text and physical make up, subject and content, exercises and activities, language type, language skills, and context and its efficacy based on the standard textbook. The research was a descriptive research using questionnaire and two open-ended questions to collect the data from 45 males and females Bangladeshi teachers as the participants. The

Advances in Energy

Science and Equipment Engineering II Volume 2 Shiquan Zhou,Aragona Patty,Shiming Chen,2017-09-19 The 2016 2nd

International Conference on Energy Equipment Science and Engineering ICEESE 2016 was held on November 12-14, 2016 in Guangzhou, China. ICEESE 2016 brought together innovative academics and industrial experts in the field of energy equipment science and engineering to a common forum. The primary goal of the conference is to promote research and developmental activities in energy equipment science and engineering, and another goal is to promote scientific information interchange between researchers, developers, engineers, students, and practitioners working all around the world. The conference will be held every year to make it an ideal platform for people to share views and experiences in energy equipment science and engineering and related areas. This second volume of the two-volume set of proceedings covers the field of Structural and Materials Sciences and Computer Simulation, Computer and Electrical Engineering. *River Dynamics* Bruce L. Rhoads, 2020-04-29 Rivers are important agents of change that shape the Earth's surface and evolve through time in response to fluctuations in climate and other environmental conditions. They are fundamental in landscape development and essential for water supply, irrigation, and transportation. This book provides a comprehensive overview of the geomorphological processes that shape rivers and that produce change in the form of rivers. It explores how the dynamics of rivers are being affected by anthropogenic change, including climate change, dam construction, and modification of rivers for flood control and land drainage. It discusses how concern about environmental degradation of rivers has led to the emergence of management strategies to restore and naturalize these systems and how river management techniques work best when coordinated with the natural dynamics of rivers. This textbook provides an excellent resource for students, researchers, and professionals in fluvial geomorphology, hydrology, river science, and environmental policy. **Novel and Intelligent Digital Systems: Proceedings of the 4th International Conference (NiDS 2024)** Phivos Mylonas, Dimitris Kardaras, Jaime Caro, 2024-10-15 This book compiles the research findings presented at the 4th International Conference on Novel Intelligent Digital Systems NiDS 2024, which took place in Athens, Greece, on September 25-27, 2024, hosted by the University of West Attica. NiDS 2024 was conducted in a hybrid format, offering participants the flexibility to join either online or in person. The conference highlighted the latest innovations in intelligent systems and emphasized the collaborative research that advances Artificial Intelligence (AI) in software development. It served as a platform for high-quality research, providing a space to explore challenges and innovations in AI. NiDS 2024 referred to experts, researchers, and scholars in artificial and computational intelligence, as well as the broader field of computer science, offering insights into interconnected and complementary areas. By promoting the exchange of ideas, the conference aimed to strengthen and expand the network of researchers, academics, and industry professionals. **Civil Engineering and Urban Planning IV** Yuan-Ming Liu, Dong Fu, Zhen-Xin Tong, Zhi-Qing Bao, Bin Tang, 2016-10-28 Civil Engineering and Urban Planning IV includes the papers presented at the 4th International Conference on Civil Engineering and Urban Planning (CEUP 2015), Beijing, China, 25-27 July 2015. Fetters,2019-10-03 The Mixed Methods Research Workbook by Michael Fetters is the perfect tool for doctoral students and researchers who want support throughout their research project as well as a practical way to apply the knowledge they have learned With this text students can tackle their mixed methods research project with confidence *Neuroinflammation and Behaviour* Luba Sominsky,Adam K. Walker,Deborah M. Hodgson,2015-07-21 The brain and immune system are involved in an intricate network of bidirectional communication This relationship is vital for optimal physiological and psychological development and functioning but can also result in unwanted outcomes In particular this interaction plays an important role in cognition mood and behaviour Neuroinflammation is known to contribute to neurological and affective disorders including impaired learning and memory depressive anxiety and schizo affective symptoms as well as pain The development of these conditions often occurs on the backdrop of pre existing physical illnesses which give rise to increased activation of the immune system such as cancer obesity infection and autoimmune disorders Similarly psychological states can alter regulation of the immune system This has been most extensively studied in the context of stress and immune function Understanding the underlying mechanisms that lead to the onset of inflammation induced neuropathology and stress induced immune suppression will contribute to the development of novel and effective treatment strategies for both the disease and its neurological side effects In this research topic we explored the relationship between the immune system and the brain throughout life We include both original research and review papers from animal clinical and molecular perspectives Dissertation Abstracts International ,1970 *Complex Problem Solving Beyond the Psychometric Approach* Wolfgang Schoppek,Joachim Funke,Magda Osman,Annette Kluge,2018-09-28 Complex problem solving CPS and related topics such as dynamic decision making DDM and complex dynamic control CDC represent multifaceted psychological phenomena In abroad sense CPS encompasses learning decision making and acting in complex and dynamic situations Moreover solutions to problems that people face in such situations are often generated in teams or groups This adds another layer of complexity to the situation itself because of the emerging issues that arise from the social dynamics of group interactions This framing of CPS means that it is not a single construct that can be measured by using a particular type of CPS task e g minimal complex system tests which is a view taken by the psychometric community The proposed approach taken here is that because CPS is multifaceted multiple approaches need to be taken to fully capture and understand what it is and how the different cognitive processes associated with it complement each other Thus this Research Topic is aimed at showcasing the latest work in the fields of CPS as well as DDM and CDC that takes a holist approach to investigating and theorizing about these abilities The collection of articles encompasses conceptual approaches as well as experimental and correlational studies involving established or new tools to examine CPS DDM and CDC This work contributes to answering questions about what strategies and what general knowledge can be transferred from one type of complex and dynamic situation to another what learning conditions

result in transferable knowledge and skills and how these features can be trained
