[Handbook of Occupational Therapy for Adults with Physical Disabilities](#) William

Sit, Marsha Neville, 2024-06-01 Handbook of Occupational Therapy for Adults With Physical Disabilities by Drs William Sit and Marsha Neville provides quick and essential information for occupational therapists that are new to the adult practice setting. This handbook is primarily organized by body system into six sections: Occupational performance as a whole, Central nervous system, Peripheral nervous system, cranial nerves and sensory system, Musculoskeletal system, Cardiovascular, lymphatic, respiratory and integumentary systems, Endocrine, digestive, urinary and reproductive system. At the beginning of each section you will find a case study based on clinical experience that embodies the chapter subject. Within each section information is broken down into important aspects of the evaluation process and then followed by the implications of each system on occupational therapy intervention. Handbook of Occupational Therapy for Adults With Physical Disabilities also includes a summary chart where readers can quickly and easily find the purpose, context, form, cost and contact information for each assessment. Handbook of Occupational Therapy for Adults With Physical Disabilities is ideal for occupational therapy students, recent graduates and practitioners who are newly entering an adult physical disability practice setting.

Family Caregiving Brett H. Lewis, 2012-10-01 Family Caregiving explores one of the most precious and fulfilling gifts of love that can be given to a family member or a friend and also one of the most difficult tasks to undertake. The difficulty increases in magnitude because many family caregivers have no formal medical training other than basic first aid. In most cases all of their medical knowledge has come from their own life experiences with personal illnesses, accidents, and medications. In Family Caregiving author Brett Lewis shares his insights and the bounty of information that he learned acting as a family caregiver for both his father and his close friend. He explains that even though caregiving is stressful, being prepared and knowledgeable can reduce stress levels and better position a family member for caregiving success. A caregiver should have a thorough understanding of the patient's personal and family medical history, current symptoms, and medical conditions. It is critical to learn how to interact effectively with medical personnel, to become familiar with hospital, rehabilitation center processes and protocols, and to learn about basic medical terminology, equipment, and procedures. By sharing candid real world experiences, including his mistakes, Lewis provides a step by step guide that can enable the family caregiver to better navigate the journey of caregiving.
