Two objects collide with each other along a straight line (i.e. in one dimension), the repulsive force on object A by object B is measured as a function of time, and it is recorded in the graph shown.

1. Using the same time scale and spatial coordinate system as in the graph above, sketch a graph of the force exerted on object B by object A. Explain how you came up with this graph.

2. Compute the impulse delivered to object A by object B.

3. How are the features of the graphs of *acceleration* of the two objects related? Is it the same as the force graphs, or does something possibly make the relationships different?
