

Problem Solving Tests

Before the test	During the test	After the test
Identify the major problem types and formulas from class notes and reading. Highlight topics and problems your instructor emphasized.	Before starting the test, jot down formulas, relationships, definitions, etc. Do a brain dump at the beginning of the test and create a cheat sheet for yourself that you can refer back to during the test.	Examine the points that you missed. Review your TA or professor's feedback on your essays. Investigate what areas you were not ready for. Determine from which chapters or lessons most of the questions appeared and create a strategy to tackle those areas in the next round.
Practice working problems out of sequence. This will reveal how problems relate to each other and simulate the test-taking experience. For example: <i>Work a problem from Chapter 7, Chapter 5, then Chapter 10.</i>	Do not complete the test in chronological order. Begin with those for which you can identify a solution method quickly. Start with easier problems. Allow more time for high point value problems.	Determine the source of your errors and make a plan for next time. For example: <i>Did my errors result from carelessness? Did I fail to carry a negative sign from one step to another? Could I produce the formulas, or did I recall them incorrectly? Did I consistently miss the same kind of problem? Was I unable to solve problems because I didn't practice similar ones before the exam? Did I fail to account for all the given data in my solution method?</i>
Work with a time limit. Aim to solve as many problems as you will have on the test within the test time limit. For example: <i>Practice working 30 problems in 50 minutes.</i>	If you get stuck on a problem, ask yourself some questions to get going. For example: <i>What concepts, formulas, rules and methods can I apply? Have I seen this problem before? Could I work this problem another way or simplify what I did? How does my solution compare with examples from the book and class?</i>	If you had difficulty completing the test, try timing yourself while practicing solving problems as you prepare for the next exam.
