

# Algebra 2 Third Quarter Review Assignment

Each problem below is similar to the questions on the 3<sup>rd</sup> Quarter Practice Exam.

You must show your work to receive credit!

Question 1) Identify the inverse of the function.

$$f(x) = \frac{3x+2}{4}$$

$$y = \frac{3x+2}{4}$$

$$4y = 3x+2$$

$$4y - 2 = 3x$$

$$\frac{4y-2}{3} = x$$

$$f^{-1}(x) = \frac{4y-2}{3}$$

Question 2) Solve the equation.

$$27^{3x+4} = 9^{2x-4}$$

$$3^{3(3x+4)} = 3^{2(2x-4)}$$

$$3^{9x+12} = 3^{4x-8}$$

$$9x+12 = 4x-8$$

$$9x-4x = -8-12$$

$$5x = -20$$

$$x = -4$$

Question 3) Solve the equation.

$$\log_3(4x-2) - \log_3 2 = 2$$

$$\log_3 \left( \frac{4x-2}{2} \right) = 2$$

$$\frac{4x-2}{2} = 3^2$$

$$4x-2 = 9$$

$$4x = 11$$

$$x = \frac{11}{4}$$

Question 4) Solve the equation.

$$x - \frac{21}{x} = -4$$

$$x^2 - 21 = -4x$$

$$x^2 + 4x - 21 = 0$$

$$(x+7)(x-3) = 0$$

$$x+7 = 0 \quad x-3 = 0$$

$$x = -7 \quad x = 3$$

Strutchens, 2018-02-06 Transforming the standards into learning outcomes just got a lot easier In this resource you can see in an instant how teaching to your state standards should look and sound in the classroom Under the premise that math is math the authors provide a Cross Referencing Index for states implementing their own specific mathematics standards allowing you to see and understand which page number to turn to for standards based teaching ideas It s all here page by page The mathematical progression of each conceptual category starting with modeling as a unifying theme and moving through number and quantity algebra functions geometry and statistics and probability building from eighth grade standards The mathematics embedded in each conceptual category for a deeper understanding of the content How standards connect within and across domains and to previous grade standards so teachers can better appreciate how they relate How content standards connect with the standards for mathematical practice with a focus on modeling as a unifying theme Example tasks progressions of tasks and descriptions of what teachers and students should be doing to foster deep learning Your Mathematics Standards Companion is your one stop guide for teaching planning assessing collaborating and designing powerful high school mathematics curriculum in any state or district

*A Review of High-school Mathematics* William David Reeve, Raleigh Schorling, 1915 Numerical Methods for Roots of Polynomials - Part II J.M. McNamee, V.Y. Pan, 2013-07-19

We deal here with low degree polynomials mostly closed form solutions We describe early and modern solutions of the quadratic and potential errors in these Again we give the early history of the cubic and details of Cardan s solution and Vieta s trigonometric approach We consider the discriminant which decides what type of roots the cubic has Then we describe several ways both old and new of solving the quartic most of which involve first solving a resolvent cubic The quintic cannot in general be solved by radicals but can be solved in terms of elliptic or related functions We describe an algorithm due to Kiepert which transforms the quintic into a form having no or term then into a form where the coefficients depend on a single parameter and later another similar form This last form can be solved in terms of Weierstrass elliptic and theta functions and

finally the various transformations reversed

**Making Algebra Come Alive** Alfred S. Posamentier, 2000-07-21 Activities in Algebra is a set of versatile enrichment exercises that covers a very broad range of mathematical topics and applications from the Moebius strip to the googol. Several criteria have been used in developing the activities and in selecting the topics that are included. All of them bear heavily and equally on our concerns for curriculum goals and classroom management. Each activity is presented as a reproducible student investigation. It is followed by guidelines and notes for the teacher. Each activity is keyed to the National Council of Teachers of Mathematics (NCTM) Standards Revised. This link to the NCTM standards allows teachers to facilitate linking classroom activities to specific state and school district content standards. First and foremost, the activities are meant to be motivational. As much as possible, we want this book to achieve the goal of being attractive to people who thought they didn't like mathematics. To accomplish this, it is necessary for the activities to be quite different from what students encounter in their basal texts, different in both substance and form. This seems especially critical, no matter how excellent a basal text is being used, nearly every class experiences the blahs. Unfortunately, this sort of boredom is often well entrenched long before the teacher and perhaps even the students are aware of it. Presenting activities on a regular basis gives the variety and change of pace needed to sustain interest in any subject.

**Pedagogy and Content in Middle and High School Mathematics**

G. Donald Allen, Amanda Ross, 2017-11-10 The book provides an accumulation of articles included in Focus on Mathematics Pedagogy and Content, a newsletter for teachers published by Texas A M University. Each article presents a discussion of a middle or high school mathematics topic. Many of the articles are written by professors at Texas A M University. The book is broken into three parts with the first part focusing on content and pedagogy related to the NCTM content strands of Number, Algebra, Geometry, Measurement and Statistics, and Probability. Articles include an in-depth presentation of mathematical content as well as suggested instructional strategies. Thus, the integration of content knowledge and pedagogical knowledge is emphasized. The second and third parts apply to assessments, mathematical games, teaching tips, and technological applications. While other pedagogical reference books may provide an in-depth look at how to teach a topic, this book includes articles that also explain a topic in great length. Thus, teachers may develop content knowledge first and then re-read each article in order to learn appropriate instructional strategies to use. Many articles include technological applications which are interspersed throughout the book. In addition, a special section which includes helpful information, available tools, training sessions, and other references for using technology in mathematics is also presented.

**A Quiet Revolution**

Michael D. Steele, Craig Huhn, 2018-03-01 Over the past thirty years, Holt High School in central Michigan has engaged in a quiet revolution that has transformed mathematics teaching and learning in the district. From its roots as a rural high school housed in a single building in the 1980s, the high school mathematics staff has grown an innovative, meaningful high school mathematics curriculum that sees nearly every student in the district completing the equivalent of Precalculus.

Tracking was dropped in favor of an evolving suite of supports designed to promote student success in unifying rather than segregating ways Mathematics classrooms in Holt are discourse rich environments where teachers and students explore meaningful uses for mathematics as they reason and problem solve together This transformation took place and persists amidst changing professional partnerships shifting district demographics increasing accountability measures at the state and national level and turnover in teaching staff and district leadership In this book we explore the case of Holt High School though an exploration of how the mathematics curriculum has shifted over the past thirty years and the conditions and supports that have been put in place in the district to make this work fruitful and sustainable The story includes successes failures celebrations and challenges as we chronicle Holt s high school mathematics evolution Guiding questions protocols and reflective activities are provided for teachers and district leaders to begin the challenging conversations in their own district that lead to meaningful change
