MUTUALLY EXCLUSIVE

EVENTS

Mutually exclusive events are things that can't happen at the same time. In logic and probability theory, two propositions (or events) are **mutually exclusive** or **disjoint** if they cannot both occur. If A and B are mutually exclusive events then the joint probability of A and B equals zero. Thus, results to a null set.

EXAMPLES OF MUTUALLY EXCLUSIVE

EVENTS

Turning Left and turning Right are Mutually Exclusive (you can't do both at the same time)

Corporate Tax Evasion in a Globalized Environment Alexander

Teepe,2007-02-13 Inhaltsangabe Abstract There are only few results of empirical research about corporate tax evasion and avoidance in comparison to individual tax evasion One reason is a lack of exact data Moreover due to the nature of tax non compliance it is not easy to calculate its volume There is set of empirical questions on which we can make progress such as the determinants of corporate evasion for example the impact of penalties on corporate tax directors in large enterprises or the size of a company and the owner structure It is material for policymakers to know which characteristic of enterprises let us assume that a firm evades more or less and which circumstances enhance corporate tax evasion We suggest that the developments in a more globalized world may change incentives for non compliance of enterprises and change the options to evade taxes in particular for import or export firms The growing importance of transfer prices for tax directors of multinational enterprises may emphasize this assumption But not only large multinational enterprises have options to evade taxes Also smaller companies controlled by private owners can misstate import and export invoices in order to shift profits into low tax countries or tax haven countries or build up capital in the informal economy We analyze the existing basic theory and provide a critical discussion to it And we survey the existing empirical literature about corporate tax evasion Furthermore we present the results of a corporate tax survey in China and Germany By this survey related to import and export firms of all size evidence is provided that there are remarkable incentives to evade taxes by manipulation of commercial invoices We find that this type of tax evasion by importers and exporters is basically determined by the same effects as corporate tax compliance in general but there are in addition specific effects on compliance such as effects by trading countries of the firms or by the supply chain Finally this paper presents various indications which imply the need of an international framework to analyze corporate tax compliance Inhaltsverzeichnis Table of Contents Figures3 Tables4 ABSTRACT8 1 INTRODUCTION8 1 1DEFINITION CORPORATE TAX EVASION13 2 LITERATURE REVIEW OVER PREVIOUS STUDIES OF CORPORATE TAX NON COMPLIANCE14 2 1THEORETICAL MODELS OF CORPORATE TAX EVASION14 2 1

to the often bewildering world of experimental design and statistics It provides a complete map of the entire process beginning with how to get ideas about research how to refine your research question and the actual design of the experiment leading on to statistical procedure and assistance with writing up of results While many books look at the fundamentals of doing successful experiments and include good coverage of statistical techniques this book very importantly considers the process in chronological order with specific attention given to effective design in the context of likely methods needed and expected results Without full assessment of these aspects the experience and results may not end up being as positive as one might have hoped Ample coverage is then also provided of statistical data analysis a hazardous journey in itself and the reporting of findings with numerous examples and helpful tips of common downfalls throughout Combining light humour empathy with solid practical guidance to ensure a positive experience overall *How to Design and Report Experiments* will be essential reading for students in psychology and those in cognate disciplines with an experimental focus or content in research methods courses
