Traditional Leaders in a Democracy MISTRA MISTRA, 2019-03-29 Post 1994 South Africa s traditional leaders have fought for recognition and positioned themselves as major players in the South African political landscape Yet their role in a democracy is contested with leaders often accused of

abusing power disregarding human rights expropriating resources and promoting tribalism Some argue that democracy and traditional leadership are irredeemably opposed and cannot co exist Meanwhile shifts in the political economy of the former bantustans the introduction of platinum mining in particular have attracted new interests and conflicts to these areas with chiefs often designated as custodians of community interests This edited volume explores how chieftancy is practised experienced and contested in contemporary South Africa It includes case studies of how those living under the authority of chiefs in a modern democracy negotiate or resist this authority in their respective areas Chapters in this book are organised around three major sites of contest leadership land and law *Politics at a Distance from the State* Lucien van der Walt, Kirk Helliker, 2022-08-23 For decades most anti capitalist and anti imperialist movements identified radical transformation with capturing state power The collapse of these statist projects from the 1970s led to a global crisis of left and working class politics But crisis has also opened space for rediscovering alternative society centered anti capitalist modes of bottom up change operating at a distance from the state These have registered important successes in practice such as the Zapatistas in Mexico and Rojava in Syria They have been a key influence on movements from Occupy in United States to the landless in Latin America to anti austerity struggles in Europe and Asia to urban movements in Africa Their lineages include anarchism syndicalism autonomist Marxism philosophers like Alain Badiou and radical popular praxis This path breaking volume recovers this understanding of social transformation long side lined but now resurgent like a seed in the soil that keeps breaking through and growing It provides case studies with reference to South Africa and Zimbabwe and includes a dossier of key texts from a century of anarchists syndicalists insurgent unionists and anti apartheid activists in South Africa Originating in an African summit of radical academics struggle veterans and social movements the book includes a preface from John Holloway **Handbook on Teaching and Learning for Sustainable Development** Walter Filho Leal, Amanda Lange Salvia, Fernanda Frankenberger, 2021-06-25 Exploring the important role of education in both pursuing and implementing sustainable development this timely Handbook highlights how teaching methods at schools and universities can impact the future It looks at ways not only to inform students about matters related to sustainable development but also to empower them to adopt behaviours and actions that lead to more sustainable lifestyles Natural Resource-Based Conflicts in Rural Zimbabwe Joshua Matanzima, Patience Chadambuka, Kirk Helliker, 2024-08-02 This book investigates the range of conflicts over land and other natural resources in contemporary Zimbabwe considering the different forms these conflicts take and the ensuing outcomes Zimbabwe is a country rich in natural resources including land wildlife minerals and water resources These resources are integral to the formal and informal livelihoods of most Zimbabweans as well as supporting many key industries Wildlife land and water resources are also embedded in indigenous knowledge systems religious beliefs and rituals in many rural communities forming an important part of people s identity and sense of belonging However this book demonstrates the ways in which rural communities are being denied access to these resources and being

displaced by extractive companies and the government Their response is often to turn to violence to try to reclaim their lands Drawing on original empirical research from different conflicts across Zimbabwe the book also considers the issue in the context of problems such as climate change human wildlife conflicts and politico economic crises This book will be useful to policy makers students conservationists and academics across the fields of sociology human geography development political science and environment studies
