

SABRE Interface Preparation

Preparing for Interface

Preparing for interface starts by contacting your SABRE representative. Interface is an option offered by SABRE, and there may be charges incurred. Trams does not charge for interface options. SABRE enables interface options by assigning a line number or address referred to as a LNIATA. This is similar to the terminal and printer addresses in your main office. Any branch access and STP sites should be linked via SABRE, and Interface options should be discussed with the SABRE customer service center. You can view your agency options by typing PE*PCC. The PCC represents your pseudo city code. The following considerations should be discussed with SABRE.

Interface Option 6

Professional SABRE agencies use SABRE option 2 which allows for invoicing and ticketing. To enable interface, your site must be **cutover** to allow for SABRE option 6 features, which include the creation and format of Interface records. (Interface options are controlled by SABRE.)

Interface options can be flagged in your Agency profile referred to as the TJR. These options include flags to include Refunds and Exchanges, E-tickets, invoice only or invoice and itineraries for hotel updates as well as manual fare by leg information for segments not auto-priced by SABRE.

SABRE Printing Module

In most SABRE platforms, SABRE uses the Sabre Printing Module to control HOST devices such as ticket printers, invoice printers, hardcopy printers or interface records. A SABRE field services technician or SABRE hardware support desk can help you configure the utility for interface files or cable options.

Images to File

SABRE Net locations require interface configured to a file, while other platforms give you an option. When configured as a Device Type: File, Trams must have network access to the folder location named in the Device properties. Default configuration:

C:\SABRE\APPS\INTERFACE\PNRDATA.TXT

Analysis of Errors in Transducer Calibration Techniques Used for Blast Phenomena Tests Falih Ahmad, 1985 Strain gage transducers are commonly used in the formation of measurement circuits for recording different physical phenomena such as acceleration displacement pressure etc One method of rating used in these circuits is the shunt resistor calibration technique which is considered both satisfactory and reliable A mathematical model representing the static measurement circuit is used to study the effect of major parameters on the calibration procedure Three parameters are considered the length of the cable which connects the transducer to the rest of the measurement circuit elements the nonlinear characteristic of the transducer and the balanced potentiometer setting The main advantage gained from this investigation is the improvement in measurement accuracy Keywords Army Corps of Engineers Waterways Experimental station Statistical analysis Static electrical response and Strain gage bridge circuits Author **Computerworld** , 1989-09-11 For more than 40

Geschichtserzählungen sind immer Ausschnitte und spezielle Sichtweisen auf die Entwicklungen Mein Ansatz in diesem Buch ist eine Perspektive über die ich in dieser Form noch kein Werk gefunden habe Ich betrachte nicht die Protagonisten oder die

Firmen und auch nicht in erster Linie die technischen Fortschritte in der Rechentechnik sondern konzentriere mich auf die Evolution des Interfaces also auf die Nutzungsschnittstelle Allgemeiner formuliert interessiert mich in diesem Buch wie sich die Art und Weise Computer zu bedienen im Laufe der Zeit weiterentwickelt hat und was hinter diesen Entwicklungen stand Der Begriff Evolution im Titel ist dabei nicht leichtfertig gewählt Evolution ist in der Biologie nicht einfach eine beliebige Entwicklung sondern eine zusehends bessere Anpassung einer Lebensform an die Umweltbedingungen und die sich aus ihnen ergebenden Gefahren Will man die Evolution einer Spezies erklären muss man immer auch die Umwelt der Spezies mitbetrachten Was die Entwicklung der Nutzungsschnittstellen der Computer mit der biologischen Entwicklung gemein hat ist ihre Wechselwirkung mit der Umwelt Bei der biologischen Evolution ist es die natürliche Umgebung des Menschen die betrachtet werden muss und bei der Evolution der Nutzungsschnittstelle sind es der Stand der Rechentechnik auf der einen und die Nutzungsanforderungen die an den Computer und seine Bedienung gestellt wurden auf der anderen Seite Um diese Anforderungen erfüllen zu können bedarf es technischer Entwicklungen Bereits vorhandene Technik ermöglicht dann ihrerseits vorher nicht denkbare Nutzungsformen aus denen wieder neue Anforderungen an die Technik und Schnittstellengestaltung resultieren Die Nutzungsschnittstelle ist eine Grenze Auf der einen Seite der Schnittstelle nach außen hin gibt es nur die Objekte der Nutzungswelt und auf der nach innen gerichteten Seite nur die physikalischen Gegebenheiten der technischen Welt Bruce Tognazzini nennt die Nutzungswelt eine fanciful illusion Um genau diese Scheinwelten geht es mir Wie sind sie entstanden Welche Nutzungsanforderungen standen hinter ihrer Ausgestaltung Welche technischen Probleme waren zu lösen Was waren die Hintergründe hinter Nutzungsschnittstellen die heute kurios wirken und inwiefern haben Designentscheidungen aus vergangenen Jahrzehnten noch heute Auswirkungen auf die Art und Weise wie wir unsere Computer bedienen Fragen dieser Art will ich in den kommenden Kapiteln nachgehen Ich hoffe Sie folgen mir dabei
