on different continents can be a powerful tool to better understand the ways in which ecosystems respond to global change. Large areas are often needed to characterize the causal mechanisms governing interactions between ecozones and their environments. Factors such as weather and climate patterns, land-ocean and land-atmosphere interactions all play important roles. As a result of the strong physical north-south symmetry between the western coasts of North and South America, the similarities in climate, coastal oceanography and physiography between these two regions have been extensively documented. *High Latitude Rain Forests and Associated Ecosystems of the West Coast of the Americas* presents current research on West Coast forest and river ecology and compares ecosystems of the Pacific Northwest with those of South America.

Rainforests Kimberly Sidabras, 2018. The world's rainforests have been called the lungs of the Earth because the trees and plants found in rainforest areas produce approximately 40 percent of the world's oxygen. Rainforests are areas of woodland that receive more than 60 to 80 inches (150 to 200 cm) of rain a year. Most rainforest lies in the tropics, but there are also temperate rainforests in many cooler parts of the globe. The world's rainforests are rich in plant, animal and insect life, but they are threatened by development. *THE WORLD'S BIOMES* series provides information on five of the most important large ecological systems in the world today: deserts, grasslands, oceans, rainforests and wetlands. Each book in the series describes the climate, geology, vegetation and animal life found in a particular biome, as well as the modern threats and what people can do about them. Each book in the series describes the climate, geology, vegetation and animal life found in a particular biome, as well as the modern threats and what people can do about them. Each title in this series includes color photos throughout and back matter including an index and further reading lists for books and internet resources. Key Icons appear throughout the books in this series in an effort to encourage library readers to build knowledge, gain awareness, explore possibilities and expand their viewpoints through our content-rich non-fiction books. Key Icons in this series are as follows: Words to Understand are shown at the front of each chapter with definitions. These words are set in boldfaced type in that chapter so that readers are able to reference back to the definitions, building their vocabulary and enhancing their reading comprehension. Sidebars are highlighted graphics with content-rich material within that allows readers to build knowledge and broaden their perspectives by weaving together additional information to provide realistic and holistic perspectives. Educational Videos are offered in chapters through the use of a QR code that when scanned takes the student to an online video showing a moment in sports history, a speech or an instructional video. This gives the readers additional content to supplement the text. Text-Dependent Questions are placed at the end of each chapter. They challenge the reader's comprehension of the chapter they have just read while sending the reader back to the text for more careful attention to the evidence presented there. Research Projects are provided at the end of each chapter as well and provide readers with suggestions for projects that encourage deeper research and analysis. And a Series Glossary of Key Terms is included in the back matter containing terminology used throughout the series. Words found here broaden the reader's knowledge and
