International Practices to Promote Budget Literacy Harika Masud, Helene Pfeil, Sanjay Agarwal, Alfredo Gonzalez Briseno, 2017-08-09 Budget literacy is defined as the ability to read decipher and understand public budgets to enable and enhance meaningful citizen participation in the budget process It is comprised of two main parts i a technical understanding of public budgets including familiarity with government spending tax rates and public debt and ii the ability to engage in the budget process comprising of practical knowledge on day to day issues as well as an elementary understanding of the economic social and political implications of budget policies the stakeholders involved and when and how to provide inputs during the annual budget cycle Given that no international standards or guidelines have been established for budget literacy education to date this book seeks to address this gap by taking stock of illustrative initiatives promoting budget literacy for youth in selected countries The underlying presumption is that when supply side actors in the budget process governments simplify and disseminate budget information for demand side actors citizens this information will then be used by citizens to provide feedback on the budget However since citizens are often insufficiently informed about public budgets to

constructively participate in budget processes one way to empower them and to remedy the problem of budget illiteracy is to provide budget literacy education in schools to youth helping them evolve into civic minded adults with the essential knowledge needed for analyzing their government's fiscal policy objectives and measures and the confidence and sense of social responsibility to participate in the oversight of public resources This book elaborates on approaches learning outcomes pedagogical strategies and assessment approaches for budget literacy education and presents lessons that are relevant for the development improvement or scaling up of budget literacy initiatives

What Ails France? Brigitte Granville, 2021-04-01 As evidenced by the yellow vests protest movement that began in France in 2018 the state of the French nation inspires gloom among many of its citizens Brigitte Granville views this malaise as a peculiarly French symptom of the difficulties experienced by many advanced industrial democracies in the face of globalization technology and mass immigration Granville brings trenchant criticism to bear in this wide ranging survey of the political economy of contemporary France building her case for the prosecution on the self reinforcing rigidity produced by a narrow Parisian oligarchy that is both entitled and intellectually hidebound What Ails France applies an economist's vision to the monetary and fiscal pathologies flowing from this ideologically motivated technocratic rule reflected in Europe's flawed monetary union runaway indebtedness and chronically high structural unemployment The author marshals academic research from a wide range of disciplines to fuel a provocative and at times contentious analysis proposing various treatments for French ailments that would reinvigorate the republican value of liberty with a new local slant A refreshing ideologically freewheeling discussion What Ails France provides a positive take on the innovations of our digital age exploring their potential to bring about a more representative democracy and a fairer society

**Extralegal Groups in Post-Conflict Liberia** Christine Cheng, 2018-05-11 In the aftermath of the Liberian civil war groups of ex combatants seized control of natural resource enclaves in the rubber diamond and timber

sectors With some of them threatening a return to war these groups were widely viewed as the most significant threats to Liberia's hard won peace Building on fieldwork and socio historical analysis this book shows how extralegal groups are driven to provide basic governance goods in their bid to create a stable commercial environment This is a story about how their livelihood strategies merged with the opportunities of Liberia's post war political economy But it is also a context specific story that is rooted in the country's geography its history of state making and its social and political practices This volume demonstrates that extralegal groups do not emerge in a vacuum In areas of limited statehood where the state is weak and political authority is contested where rule of law is corrupted and government distrust runs deep extralegal groups can provide order and dispute resolution forming the basic kernel of the state This logic counters the prevailing spoiler narrative forcing us to reimagine non state actors and recast their roles as incidental statebuilders in the evolutionary process of state making This leads to a broader argument it is trade rather than war that drives contemporary statebuilding Along the way this book poses some uncomfortable questions about what it means to be legitimately governed whether our trust in states is ultimately misplaced whether entrenched corruption is the most likely post conflict outcome and whether our expectations of international peacebuilding and statebuilding are ultimately self defeating
