Information Systems and Technology for the Noninformation Systems Executive Jae K. Shim, 2000-06-22. Thirty years ago, computers seemed more science fiction than business fact. Today, we have e-commerce, e-marketing, computerized scheduling, manufacturing, and a whole new field called information technology. Computers now have applications for every facet of your business. Information Systems and Technology for the Non Information Systems Executive explores the practical and efficient use of computer technology, both software and hardware, for all types of business applications. In a simple and reader-friendly style, Shim presents information on databases, networking, and telecommunications. He explains popular accounting, tax, finance, management, manufacturing, and marketing software, making them easy to understand and use. In addition, he provides real-life examples that illustrate the applications of decision support systems, executive information systems, and artificial intelligence systems, such as financial modeling, budgeting, strategic planning, and control, forecasting, data analysis, inventory planning, and optimization software. You do not need to know programming to understand your information systems. Written for business managers and entrepreneurs who may not have extensive computer experience, Information Systems and Technology for the Non Information Systems Executive: An Integrated Resource Management Guide for the 21st Century covers information systems in all phases and functional areas of business to help you make the best decisions. It provides a wealth of current and essential information for managers and executives of all types of organizations. Your success depends on keeping abreast of the latest applications and thinking in information technology. This book gives you the competitive edge.

A TEXTBOOK ON AI IN FORMULATION AND PREFORMULATION Prof. Kiran Bhosale, Prof. Pooja Bhosale, Dr. Ashwini Jadhav, Dr. Tushar Shelke, I express my sincere gratitude to all those who contributed to the successful development of this pharmacy textbook. First and foremost, I am deeply thankful to Dr. Ashwini Jadhav, whose expert guidance, critical insights, and continued encouragement were instrumental throughout the writing process. Their vast knowledge in the field of pharmacy helped shape the content to meet both academic and practical standards. I would also like to thank the Department of Pharmaceutics at Genba Sopanrao Moze College of Pharmacy, Pune, for providing the necessary resources, infrastructure, and academic environment that fostered this work. Special appreciation is extended to the reviewers, academic peers, and researchers whose feedback, comments, and reference materials contributed significantly to the accuracy and depth of the content. Their work has laid the foundation for many of the concepts discussed in this book. I am also grateful to my students whose enthusiasm for learning and inquisitive questions inspired the inclusion of real-world examples and case studies to make the content more accessible and application-oriented.
