

## Record Book of Engine Parameters

Name of ship \_\_\_\_\_

### About this record book

A record book of engine parameters is required by Marine Protection Rules Part 199, if an engine's technical file states the engine's compliance with the NO<sub>x</sub> emission limits must be tested using the "Engine parameter check method". Not all technical files include a format for the record book.

You can use this template for a "Record Book of Engine parameters" to record all parameter changes, including components and engine settings which may influence the NO<sub>x</sub> emission of an engine. You can amend the fields to reflect the engine's specific components and settings.
