Santos-Arteaga, 2019-04-05 This book considers Thorstein Veblen's central preoccupation with the dark places of business enterprise an integral part of the old institutional economics Combining the contributions made by Karl William Kapp and Philip Mirowski it proposes the systematization of an adjourned institutional theory of social costs of business enterprise useful for the analysis of contemporary crises The Dark Places of Business Enterprise explores the research potential of the theory of social costs for the analysis of actual business behavior in the current globalized privatization regime It begins with a detailed outline of Veblen's critique of business enterprise and market competition before illustrating the methodical enrichment of this approach through Kapp's work Finally it concludes by proposing the integration of the Veblenian Kappian

approach with Mirowski's theory of markets and business doubt manufacture. The resulting theory of social costs will shed light on the ubiquitous business control of society under the now dominant computer-based technological infrastructure. This interdisciplinary foundation of the theory of social costs encompassing knowledge from computer science and engineering to natural sciences provides the tools required to analyze this great transformation.

Coleridge and Contemplation Peter Cheyne, 2017. Coleridge and Contemplation is a multi-disciplinary volume on Samuel Taylor Coleridge, founding poet of British Romanticism, critic and author of philosophical, political, and theological works. In his philosophical writings, Coleridge increasingly developed his thinking about imagination, a symbolizing precursor to contemplation, to a theory of contemplation itself, which for him occurs in its purest form as a manifestation of Reason. Coleridge is a particularly challenging figure because he was a thinker in process and something of an omnivore, a Renaissance man of the Romantic era. The dynamic quality of his thinking, the dark fluxion pursued but ultimately unfixable by thought, and his extensive range of interests make essential an approach that is philosophical yet also multi-disciplinary. This is the first collection to be written mainly by philosophers and intellectual historians on Coleridge's mature philosophy. With a foreword by Baroness Mary Warnock and original essays by prominent philosophers such as Roger Scruton, David E. Cooper, Michael McGhee, and Andy Hamilton, this volume provides a stimulating collection of insights and explorations into what Britain's foremost philosopher-poet had to say about the contemplation that he considered to be the highest of the human mental powers. The chapters by philosophers are supported by new developments in philosophically minded criticism from Coleridge scholars in English departments, including Jim Mays, Kathleen Wheeler, and James Engell. They approach Coleridge as an energetic yet contemplative thinker concerned with the intuition of ideas and the processes of cultivation in self and society. Other chapters from intellectual historians and theologians clarify the historical background and religious musings of Coleridge's thought regarding contemplation.

Obligation and Commitment in Family Law Gillian Douglas,2018-04-19 A tension lies at the heart of family law Expressed in the language of rights and duties it seeks to impose enforceable obligations on individuals linked to each other by ties that are usually regarded as based on love or blood Taking a contextual approach that draws on history sociology and social policy as well as law and legal theory this book examines the concept of obligation as it has been developed in family law and the difficulties the law has had in translating it from a theoretical and ideological concept into the basis of enforceable actions and duties Increasingly the idea of commitment has been offered as the key organising principle for the recognition of family

relationships often as a means of rebutting claims that family ties are becoming attenuated but the meaning and scope of this concept have not been explored The book traces how the notion of commitment is understood and how far it has come to be used as a rationale for imposing the core legal obligations which underpin care and caring within families *The Legal Order* Åke Frändberg, 2018-08-16 In this monograph a fundamental distinction is made between law and juridical thinking Law is the content of legal rules and the systems of legal rules Juridical thinking is the handling of the law by the lawyers To this distinction corresponds a basic distinction between the language of law and the language of juridical thinking and correlatively between L concepts law concepts and J concepts juridical or jurisprudential concepts The monograph is devoted to the J concepts especially of technical not ideological or evaluative J concepts Four kinds of J concepts are investigated morphological J concepts those that help us to structure the law in a logical and functional way topological J concepts those that help us to indicate the phenomena to which the law is applicable and to separate the areas of application for different legal systems praxeological J concepts those that help us to explore the relations between law and action and methodological J concepts those that help us to describe the methods of the professional juridical handling of the law The work can be characterised as presenting a lawyer's philosophy of law

Capes, 2023 In *Moral Responsibility and the Flicker of Freedom* Justin A. Capes challenges that thought experiments such as the sort devised by Harry Frankfurt are counter examples to the principle that a person is morally responsible for what he did only if he could avoid doing it He argues that far from being counterexamples to the principle Frankfurt cases as they have come to be known actually provide further confirmation of it a conclusion that has important implications for our understanding of free will and

moral responsibility **Taming Capitalism Before Its Triumph** Koji Yamamoto,2018 Early modern England had a distinctive preoccupation with the social responsibilities of private businesses Koji Yamamoto explores for the first time how promises of public service in the economic sphere came to be abused and how statesmen playwrights petitioners and merchants responded to such perversions of promised public service *Metaepistemology* Conor McHugh,Jonathan Way,Daniel Whiting,2018-12-06 Epistemology like ethics is normative Just as ethics addresses questions about how we ought to act so epistemology addresses questions about how we ought to believe and enquire We can also ask metanormative questions What does it mean to claim that someone ought to do or believe something Do such claims express beliefs about independently existing facts or only attitudes of approval and disapproval towards certain pieces of conduct How do putative facts about what people ought to do or believe fit in to the natural world In the case of ethics such questions have been subject to extensive and systematic investigation yielding the thriving subdiscipline of metaethics Yet the corresponding questions have been largely ignored in epistemology there is no serious subdiscipline of metaepistemology This surprising state of affairs reflects a more general tendency for ethics and epistemology to be carried out largely in isolation from each other despite the important substantive and structural connections between them A movement to overturn the general tendency has only recently gained serious momentum and has yet to tackle metanormative questions in a sustained way This edited collection aims to stimulate this project and thus advance the new subdiscipline of metaepistemology Its original essays draw on the sophisticated theories and frameworks that have been developed in metaethics concerning practical normativity examine whether they can be applied to epistemic normativity and consider what this might tell us about both
