The rate of change of this function is 3 or 3 because the output value increases by 3 when the input value increases by 1.

The rate of change of this function is 3 because the output value increases by 3 when the input value increases by 1.

Rate of change is also called "slope".

You can create a table or graph of other functions to determine the rate of change.

$$y = -3x + 4$$

The rate of change of this function is -3 because the output value decreases by 3 when the input value increases by 1. The coefficient of x is always the slope or rate of change!
