Which of the following lists best illustrates the idea of increasing levels of complexity?

- A. Cells, tissues, organelles, organs, systems
- B. Tissues, cells, organs, organelles, systems
- C. Organs, organelles, systems, cells, tissues
- D. Organelles, cells, tissues, organs, systems

✓ D. Organelles, cells, tissues, organs, systems

This list illustrates the idea of increasing levels of complexity because it starts with organelles, which are the smallest functional units within a cell. Cells are then formed by the organization of organelles. Tissues are formed by the organization of cells with similar functions. Organs are formed by the organization of different tissues working together. Finally, systems are formed by the organization of multiple organs working together to perform specific functions. This progression demonstrates an increasing level of complexity as smaller units come together to form larger and more complex structures.

Anatomy is to _____ as physiology is to _____.

- A. Form; structure
- B. Growth; form
- C. Structure; function
- D. Function; form
- E. Structure; form

✓ C. Structure; function

Anatomy is the study of the structure of organisms, while physiology is the study of the function of organisms. Therefore, the relationship between anatomy and physiology is that anatomy focuses on the structure of organisms, while physiology focuses on the function of organisms.
