

Rolm Unveils Computer/Telephone Systems

Rolm has introduced two new systems combining personal computers with Rolm telephone systems. Cedar is a complete IBM PC-compatible computer and multiline digital telephone, and Juniper is a telephone attachment for the IBM PC. Both systems can only be used by companies that have Rolm's CBX private branch exchange (PBX). Both can emulate DEC or IBM terminals to access mainframes.

Cedar includes a multiline digital telephone, a speakerphone, an IBM-compatible personal computer, and communications hardware and software allowing communications over internal phone lines at up to 19,200 bps. Cedar and Juniper can also access modems at-

tached to the CBX system to communicate with the outside world. The system includes 512K bytes of memory, two 5¼-inch disk drives, a 9-inch monitor, and MS-DOS 2.11.

Juniper consists of an

adapter board for the IBM PC, software, and a multiline digital telephone with a two-way speakerphone. It requires an IBM PC with 256K bytes of memory.

Cedar is priced at \$4995, and Juniper is \$1495. In

quantities of 100, the prices are \$4245 and \$1360, respectively. Contact Rolm Corp., 4900 Old Ironsides Dr., Santa Clara, CA 95054, (408) 986-1000.
