Energy Performance of Buildings 2008: Special Report , Knowledge Management and Information Tools for Building Maintenance and Facility Management Cinzia Talamo, Marcella Bonanomi, 2015-10-29 This book describes the latest methods and tools for the management of information within facility management services and explains how it is possible to collect organize and use information over the life cycle of a building in order to optimize the integration of these services and improve the efficiency of processes The coverage includes presentation and analysis of basic concepts procedures and international standards in the development and management of real estate inventories building registries and information systems for facility management Models of strategic management are discussed and the functions and roles

of the strategic management center explained Detailed attention is also devoted to building information modeling BIM for facility management and potential interactions between information systems and BIM applications Criteria for evaluating information system performance are identified and guidelines of value in developing technical specifications for facility management services are proposed The book will aid clients and facility managers in ensuring that information bases are effectively compiled and used in order to enhance building maintenance and facility management Small Unmanned Fixed-wing Aircraft Design Andrew J. Keane, András Sóbester, James P. Scanlan, 2017-08-17 Small Unmanned Fixed wing Aircraft Design is the essential guide to designing building and testing fixed wing UAVs or drones It deals with aircraft from two to 150 kg in weight and is based on the first hand experiences of the world renowned UAV team at the UK s University of Southampton The book covers both the practical aspects of designing manufacturing and flight testing and outlines and the essential calculations needed to underpin successful designs It describes the entire process of UAV design from requirements definition to configuration layout and sizing through preliminary design and analysis using simple panel codes and spreadsheets to full CFD and FEA models and on to detailed design with parametric CAD tools Its focus is on modest cost approaches that draw heavily on the latest digital design and manufacturing methods including a strong emphasis on utilizing off the shelf components low cost analysis automated geometry modelling and 3D printing It deliberately avoids a deep theoretical coverage of aerodynamics or structural mechanics rather it provides a design team with sufficient insights and guidance to get the essentials undertaken more pragmatically The book contains many all colour illustrations of the dozens of aircraft built by the authors and their students over the last ten years giving much detailed information on what works best It is predominantly aimed at under graduate and MSc level student design and build projects but will be of interest to anyone engaged in the practical problems of getting quite complex unmanned aircraft flying It should also appeal to the more sophisticated aero modeller and those engaged on research based around fixed wing UAVs Program Manager, 1991 Sutter Basin Pilot Feasibility Final Report United States. Serebrenik,J.J. Brunekreef,2012-05-22 Templates are used to generate all kinds of text including computer code The last decade the use of templates gained a lot of popularity due to the increase of dynamic web applications Templates are a tool for programmers and implementations of template engines are most times based on practical experience rather than based on a theoretical background This book reveals the mathematical background of templates and shows interesting findings for

improving the practical use of templates First a framework to determine the necessary computational power for the template metalanguage is presented The template metalanguage does not need to be Turing complete to be useful A non Turing complete metalanguage enforces separation of concerns between the view and model Second syntactical correctness of all languages of the templates and generated code is ensured This includes the syntactical correctness of the template metalanguage and the output language Third case studies show that the achieved goals are applicable in practice It is even shown that syntactical correctness helps to prevent cross site scripting attacks in web applications The target audience of this book is twofold The first group exists of researcher interested in the mathematical background of templates The second group exists of users of templates This includes designers of template engines on one side and programmers and web designers using templates on the other side

Abdomen and Thoracic Imaging Ayman S. El-Baz, Luca Saba, Jasjit Suri, 2013-11-26 The book covers novel strategies of state of the art in engineering and clinical analysis and approaches for analyzing abdominal imaging including lung mediastinum pleura liver kidney and gallbladder In the last years the imaging techniques have experienced a tremendous improvement in the diagnosis and characterization of the pathologies that affect abdominal organs In particular the introduction of extremely fast CT scanners and high Magnetic field MR Systems allow imaging with an exquisite level of detail the anatomy and pathology of liver kidney pancreas gallbladder as well as lung and mediastinum Moreover thanks to the development of powerful computer hardware and advanced mathematical algorithms the quantitative and automated semi automated diagnosis of the pathology is becoming a reality Medical image analysis plays an essential role in the medical imaging field including computer aided diagnosis organ lesion segmentation image registration and image guided therapy This book will cover all the imaging techniques potential for applying such imaging clinically and offer present and future applications as applied to the abdomen and thoracic imaging with the most world renowned scientists in these fields The main aim of this book is to help advance scientific research within the broad field of abdominal imaging This book focuses on major trends and challenges in this area and it presents work aimed to identify new techniques and their use in medical imaging analysis for abdominal imaging
