To connect the meter to your CB or amateur radio and your antenna, you need a RG-58U coaxial cable (not supplied) with PL-259 connectors on both ends. The cable must reach from the back of the meter to your radio's antenna jack.

1. Turn off your radio, then disconnect the antenna from the radio, and plug it into **ANTENNA** on the back of the master.
2. Plug the coaxial cable into the radio's antenna jack and into **TRANSMITTER** on the back of the master.

1. Turn on your radio (transmitter). Then set **FUNCTION** on the meter to **CALL**.
2. Select a channel or frequency on your transmitter and hold down its transmit key. Do not speak into the microphone.

- An SWR reading will be different for different frequencies (channels). If you transmit on one channel more often than others, select that channel for the reading. If you transmit on several channels, choose a frequency in the middle of the range of channels you use. (For example, if you transmit on all 40 CB channels, choose Channel 20.)
- If you use a CB that has sideband modes (SSB), do not select any of these modes. (Use only AM for SWR measurements.)
- If you have an amateur radio, select the continuous wave (CW) or tuning mode to check the SWR.

- While you hold down the transmit key, rotate **CALIBRATION** on the front of the meter until the needle points to **CAL**.
- Release the transmit key, then set **FUNCTION** to **SWR**.
- Press the transmit key again, then find the **SWR** by reading the appropriate scale on the meter.
 - If your transmitter's power is less than 20 watts, read the lower scale (marked with an L on its right side).
 - If your transmitter's power is more than 20 watts, read the upper scale (marked with an H on its right side).

Thank you for purchasing your Pioneer-Gill Master from RadioShack. Measuring 2000 shows you how much of your radio's transmit power is reflected from the antenna back into the antenna cable and lost. With this information, you can adjust the length of your antenna or antenna cable to your antenna and radio configuration can operate at maximum power. Please read the user's guide before installing, setting up and using your new master antenna.
