

Deforestation

To understand the damage being caused to rainforests

Millions of forest were destroyed. This is about the same as the highly flammable H&M. Estimates that if we carry on like this rainforests will be lost in less than 100 years.

Why is the rainforest being destroyed?

The rainforests are being destroyed to allow different plants for farming, to allow roads to be built for their wood (for fuel even firewood), to make way for new settlements or roads, to allow people to mine for coal or diamonds being underneath.

Farming: areas of the rainforests are cleared to allow farmers to farm their produce to sell it. Cattle are raised for their meat, this is the highest cause of deforestation through farming. Farmers also grow bananas, cocoa beans, coffee, oil palm trees, sugar cane and tea. These can make a lot of money for the farmers but destroy huge areas of the rainforest.

Logging: This makes up 14% of all deforestation. Trees are sold on and used to build furniture or houses, or used to make paper.

Mining: when mining is done in areas of the rainforest, to extract the mineral people who still live there, however, this doesn't stop it from happening completely and it can cause conflict.

Huge amounts of rainforest are cleared each year. It is estimated that 20% of the Amazon rainforest has been cleared already.
