

The Respiratory System

Your respiratory system brings oxygen into your body and helps to remove carbon dioxide. Your lungs are part of your respiratory system. They sit in your chest, protected by your ribcage. Problems with your respiratory system can reduce the oxygen that reaches your lungs, which can make you unwell.

The Parts of the system

The respiratory system is made up of the:

- **Nose**
- **Pharynx (throat)**
- **Larynx (voice box)**
- **Trachea (windpipe)**
- **Bronchi** (airway branching from the trachea and leading to smaller bronchioles)
- **Lungs**

Nose and Nasal Cavity

Our nostrils/noses are the main route in which air enters the body.
 External (anterior) nares.
 Internal (posterior) nares.
 The nasal cavity is made up of:
 Nasal septum - Bone and hyaline cartilage
 Vestibule
 Nasal conchae
 Meatuses - (a) Superior, middle and inferior
 Olfactory region.
 Functions include:
 Air is warmed or cooled to match body temperature, moistened and filtered.
 Olfactory
 Sense of smell.

The Main Functions

- **Oxygen Supplier:** To keep the body constantly supplied with oxygen.
- **Elimination:** Removal of carbon dioxide.
- **Gas Exchange:** The organs involved in this system oversee the gas exchanges that happen between the blood and the external environment.
- **Passageway:** Create a passageway that allows air to reach the lungs.
- **Humidifier:** Purify, humidify and warms incoming air.

The Pharynx

Found posterior to the nasal cavity and extends down as far as the cricoid cartilage of the larynx. It is around 12-14cm long and lies immediately in front of the cervical vertebrae. It is divided into the:
Nasopharynx - Behind the nasal cavity and superior to the soft palate. Two openings of the auditory tube. On the posterior walls you can find the Pharyngeal tonsils.
Oropharynx - Extends from the soft palate to the level of the hyoid bone.
Laryngopharynx - Starts at the level of the hyoid bone and is the pathway that leads to the Oesophagus and the Larynx.

The Larynx

- **Larger in males:** lies in the region of the 2nd - 5th cervical vertebrae.
 Made up of **9 cartilages**:
 - **a single cartilage:** epiglottis, thyroid and cricoid.
 - **a pair of cartilages:** arytenoid, corniculate and cuneiform and vocal cords.
Functions include:
 - Production of sounds, speech, protection, passage for air, humidifies, filters and warms the air.

The Trachea

- Extends from the larynx to the 5th thoracic vertebra where bifurcation (split in two) occurs.
 - **25-30cm long, 2.5cm diameter.**
 - **16-20 C-shaped cartilage rings.**
 - **stops at the carina:** splits (bifurcates) into the left/right main bronchus.
- The trachea has 3 layers:
Outer - Fibrous, elastic tissue, encloses the cartilage.
Middle - Cartilage and bands of smooth muscle.
Inner - Ciliated, columnar epithelium with goblet cells (mucus cells).
Functions include: Support/tone, mucociliary escalator (mucus and cilia, moves mucus out of the lungs) and cough reflex.

Study Guide for Maternal-Child Nursing - E-Book Emily Slone McKinney, Sharon Smith Murray, 2021-11-16 NEW Next Generation NCLEX NGN examination style case studies familiarize students to the way that content will be tested in the new NGN exam NEW Revised review questions reflect the updated content in Maternal Child Nursing 6th Edition and allow students to quickly check their knowledge and understanding of the material in each chapter of the text *Critical Care Study Guide* Gerard J. Criner, Rodger E. Barnette, Gilbert E. D'Alonzo, 2010-06-27 Critical care medicine is a dynamic and

exciting arena where complex pathophysiologic states require extensive knowledge and up to date clinical information. An extensive knowledge of basic pathophysiology as well as awareness of the appropriate diagnostic tests and treatments that are used to optimize care in the critically ill is essential. Since our first edition 7 years ago new information crucial to the care and understanding of the critically ill patient has rapidly accumulated. Because this knowledge base crosses many different disciplines a comprehensive multidisciplinary approach presenting the information is essential similar to the multidisciplinary approach that is used to care for the critically ill patient. We have strived to provide this content in an easily digestible format that uses a variety of teaching tools to facilitate understanding of the presented concepts and to enhance information retention. To meet the demand to provide comprehensive and diverse education in order to understand the pathogenesis and optimum care of a variety of critical illnesses we have substantially revised the prior topics in the first edition with updated information. We have also markedly expanded the number of topics covered to include acute lung injury and the acute respiratory distress syndrome an expanded discussion of the physiology and operation of mechanical ventilation obstetrical care in the ICU neurosurgical emergencies acute coronary syndromes cardiac arrhythmias role of whole body rehabilitation in the ICU ethical conduct of human research in the ICU and nursing care of the ICU patient.

Study Guide for Fundamentals of Nursing Care Marti A Burton, Linda J May Ludwig, 2014-10-22 This Study Guide is the perfect companion to Fundamentals of Nursing Care Concepts Connections Skills 2nd edition. It offers practice the nursing student needs to hone their critical thinking and problem solving skills while mastering the principles concepts and procedures essential to success in the classroom and in practice.
