

Staff Station

Staff Stations are located in a room or on a floor where staff members may be working: Staff Lounges, Dictation, Lockers, and Staff Conference Rooms. The station acts as a hands free intercom between that specific room/area and the console.

Staff Terminal

The Staff Terminal is a device that functions as a patient or procedure room communications tool while providing staff with a touchscreen to initiate an instantaneous notification of an in room need. Additionally it may be used as a functional nurse call console or duplex intercom station.

Nurse Call Console

The Nurse Call Console has a colored LCD screen and is used to communicate with patients and staff from the console to speaker-equipped stations. It can also be used to set a staff level service request.

Chlorosilane Emergency Response Guidelines , Precision medicine approaches for heterogeneous conditions such as autism spectrum disorders (The need for a biomarker exploration phase in clinical trials - Phase 2m)

David Quentin Beversdorf,Craig Andrew Erickson,Paul Wang,Thomas Frazier,2023-04-17 Many therapeutic interventions for autism spectrum disorder fail when they are examined in a clinical trial Frequently there is a subset of patients that responds very well to the intervention while others do not and the overall result does not yield a positive result As autism spectrum disorder is highly heterogeneous in its underlying genetics and other etiological risk factors as well as its heterogeneous phenotypic manifestation this variability in response to any specific treatment is not entirely surprising However it remains a challenge to meaningfully subtype this heterogeneity for targeted treatment The purpose of this research topic is to solicit articles that address the heterogeneity in autism spectrum disorder in a manner that may meaningfully contribute to targeted treatment approaches Studies that address the heterogeneity of autism that could theoretically lead to targeted treatment and studies that more directly address the use of a marker in association with response to a treatment are both aspects that will contribute to this purpose It is hoped that this Research Topic will yield articles that can help advance the field towards precision medicine in autism spectrum disorders Manuscripts that contribute to the specification of the heterogeneity of autism spectrum disorder in a manner that could theoretically lead to targeted treatment would be appropriate for this research topic Additionally articles that utilize subtyping in relation to response to treatment would be appropriate for this research topic **Emergency Medical Responder (Canadian Edition) includes Navigate**
