

Third Grade Pacing Guide Weeks 1-9

Week	Unit and Topic	Skills Completed
Operations and Algebraic Thinking <i>Represent and solve problems involving multiplication and division</i>		
1-2	Interpret products of whole numbers e.g., interpret 5×7 as the total number of objects in 5 groups of 7 objects each. For example, describe a situation in which the number of objects can be represented as 5×7 .	
3-4	Interpret whole-number products of whole numbers e.g., interpret $56 \div 8$ as the number of groups in each share when 56 objects are partitioned equally into 8 shares or as a number of shares when 56 objects are partitioned into equal shares of 8 objects each. For example, describe a situation in which a number of shares is a factor of groups (or is equivalent to $56 \div 8$).	
5	Use multiplication and division within 100 to solve word problems in situations involving equal groups, arrays, and measurement quantities, e.g., for unknowns in all three positions with a number for the unknown, needed to represent the problem.	
6	Interpret the unknown in a word problem as a multiplication or division equation involving two whole numbers. For example, determine the unknown number that makes the equation true in each equation: $6 \times ? = 48$, $5 \times 6 = ?$, $? \times 3 = 27$.	
Number and Operations in Base Ten <i>Use place value understanding to perform multi-digit arithmetic</i>		
7	Use place value understanding to round whole numbers to the nearest 10 or 100. Fluently add and subtract within 100 using strategies and algorithms based on place value, properties of operations, and/or the relationship between addition and subtraction.
