**Handbook of Systemic Approaches to Psychotherapy Manuals** Mauro Mariotti, George Saba, Peter Stratton, 2022-02-17 This handbook examines the development and use of manuals to guide and support systemic couples and family therapies. It addresses the process of manualizing, providing a secure base for therapist creativity rather than delineating prescriptive procedures. The volume addresses therapist and trainer concerns by demonstrating the value of sufficiently articulating clinical and teaching models to inform colleagues of what actually occurs during therapy. The book describes the history, value, and controversies of manuals. In addition, it explores issues and experiences in the creation of manuals, identifies research issues related to the use and evaluation of manuals, and addresses training as a context for the application of treatment manuals. Key areas of coverage include: Reports of experiences with major internationally established manuals; formulations of innovative practices by their developers and specifications of training programs; Discussion of the various formats of manuals demonstrating their benefit and transportability across different contexts; Surveys of a broad selection of manuals creating a flexible and diversified concept of what forms manuals may take; Essential guidance for using manuals, which is an indispensable step for the field to progress and to claim to health resource commissioning governments and insurance agencies that the systemic practice is evidence based and effective. *The Handbook of Systemic Approaches to Psychotherapy Manuals* is an essential resource for researchers, professors, and graduate students, as well as clinicians and related therapists and professionals in clinical psychology, family studies, public health, social work, psychotherapy, child and adolescent psychology, and all interrelated disciplines. [Practical Human Factors for Pilots](#) Capt. David Moriarty, 2014-12-30 *Practical Human Factors for Pilots* bridges the divide between human factors research and one of the key industries that this research is meant to benefit: civil aviation. Human factors are now recognized as being at the core of aviation safety, and the training syllabus that flight crew trainees have to follow reflects that. This book will help student pilots pass exams in human performance and limitations, successfully undergo multi-crew cooperation training and crew resource management (CRM) training, and prepare them for assessment in non-technical skills during operator and license proficiency checks in the simulator and during line checks when operating flights. Each chapter begins with an explanation of the relevant science behind that particular subject, along with mini case studies that demonstrate its relevance to commercial flight operations. Of particular focus are practical tools and techniques that students can learn in order to improve their performance, as well as training tips for the instructor. Provides practical, evidence-based guidance on issues often at the root of aircraft accidents. Uses international regulatory material. Includes concepts and theories that have practical relevance to flight operations. Covers relevant topics in a step-by-step manner, describing how they apply to flight operations. Demonstrates how human decision-making has been implicated in air accidents and equips the reader with tools to mitigate these risks. Gives instructors a reliable knowledge base on which to design and deliver effective training. Summarizes the current state of

[The Pixelated Prisoner](#) Carolyn McKay, 2018-06-13 Technological linkages between justice and law enforcement agencies are radically altering criminal process and access to justice for prisoners Video links integral to an increasingly networked justice matrix enable the custodial appearance of prisoners in remote courts and are becoming the dominant form of court appearance for incarcerated defendants This book argues that the incorporation of such technologies into prisons is not without consequence technologies make a critical difference to prisoners experiences of criminal justice By focusing on the prison endpoint and engaging with the population most affected by video links the prisoners themselves this book interrogates the legal and conceptual shifts brought about by the technology s displacement of physical court appearance The central argument is that custodial appearance has created a heightened zone of demarcation between prisoners and courtroom participants This demarcation is explored through the transformed spatial corporeal and visual relationships The cumulative demarcations challenge procedural justice and profoundly recompose prisoners legal experiences in ways not necessarily recognised by policy makers

**Counseling for Self- and Career Construction** Jacobus Gideon (Kobus) Maree, 2020-06-29 This book sets out to provide context for innovating counseling for self and career construction It gives readers insight into the theory underlying an innovative integrative qualitative quantitative approach to career counseling Three key ideas recur throughout the book First the idea of not dispensing advice to people instead enabling them to advise themselves Second the idea of listening for instead of to people s stories to help them choose and construct careers and themselves and shape their career identities Third the idea of helping people connect what they know about themselves consciously with what they are aware of subconsciously The book confronts some of the main challenges posed by Work 4 0 on the workplace but also foreshadows the imminent advent of Work 5 0 It endeavors to promote career counselors ability to help people thrive at a time when many speculate that work itself is at risk occupational contexts no longer hold workers in the way they used to and the coronavirus pandemic is disrupting the workplace

The Future of the Red-legged Partridge Fabián Casas, Jesús T. García, 2022-09-01 There has been a recent upsurge of red legged partridge research in most countries where the species is distributed but no comprehensive review of that fresh and relevant multidisciplinary and international knowledge is available In fact this is probably the first scientific book on this important species apart from Dick Potts excellent works on British introduced population or ONCFS s Office Nationale de la Chasse et le Faune Sauvage France older technical reports This is in strong contrast with a plethora of literature in hunting magazines or non academic books not often precise realistic or well informed Thus the book fills a great bibliography gap that could have important social impact The common thread of the book is the prominent role a species like this may play for research from basic physiological or ecological knowledge to socio economics of hunting and the rural world The general framework of the book I1 is the important role that hunting and game management may play in both rural economies and biodiversity conservation with the partridge as flag species and also in identifying the dark drift that industrial incorrectly deployed management or hunting vision may have on both sustainability of resources and nature conservation at large The final aim of the book is identifying the best future scenario both for partridge hunters and managers as well as the general public
