The cell phone is the fastest-selling consumer electronic in the world. On a global basis, over 800 million cellular telephones are sold yearly. More camera-equipped cell phones are sold each year than stand-alone digital cameras. Rapid development of new technologies is leading to ever more versatile multipurpose mobile devices, including 3G Internet-enabled cell phones and PDAs. Meanwhile, RFID radio frequency identification will revolutionize wireless tracking, inventory, and logistics at all levels, from manufacturing to shipping to retailing. These developments are creating challenges for legacy companies and opportunities for nimble marketers and managers. We also include a wireless and cellular business glossary and a listing of industry contacts, such as industry associations and government agencies. Next, we profile hundreds of leading companies.
