Computational Systems Biology of Pathogen-Host Interactions Saliha Durmuş,Tunahan Çakır,Reinhard Guthke,Emrah Nikerel,Arzucan Özgür,2016-05-30 A thorough understanding of pathogenic microorganisms and their interactions with host organisms is crucial to prevent infectious threats due to the fact that Pathogen Host Interactions PHIs have critical roles in initiating and sustaining infections Therefore the analysis of infection mechanisms through PHIs is indispensable to identify diagnostic biomarkers and next generation drug targets and then to develop strategic novel solutions against drug resistance and for personalized therapy Traditional approaches are limited in capturing mechanisms of infection since they investigate hosts or pathogens individually On the other hand the systems biology approach focuses on the whole PHI system and is more promising in capturing infection mechanisms Here we bring together studies on the below listed sections to present the current picture of the research on Computational Systems Biology of Pathogen Host Interactions Computational Inference of PHI Networks using Omics Data Computational Prediction of PHIs Text Mining of PHI Data from the Literature Mathematical Modeling and Bioinformatic Analysis of PHIs Computational Inference of PHI Networks using Omics Data Gene regulatory metabolic and protein protein networks of PHI systems are crucial for a thorough understanding of infection mechanisms Great advances in molecular biology and biotechnology have allowed the production of related omics data experimentally Many computational methods are emerging to infer molecular interaction networks of PHI systems from the corresponding omics data Computational Prediction of PHIs Due to the lack of experimentally found PHI data many computational methods have been developed for the prediction of pathogen host protein protein interactions Despite being emerging currently available experimental PHI data are far from complete for a systems view of infection mechanisms through PHIs Therefore computational methods are the main tools to predict new PHIs To this end the development of new computational methods is of great interest Text Mining of PHI Data from Literature Despite the recent development of many PHI specific databases most data relevant to PHIs are still buried in the biomedical literature which demands for the use of text mining techniques to unravel PHIs hidden in the literature Only some rare efforts have been performed to achieve this aim Therefore the development of novel text mining methods specific for PHI data retrieval is of key importance for efficient use of the available literature Mathematical Modeling and Bioinformatic Analysis of PHIs After the reconstruction of PHI networks experimentally and or computationally their mathematical modeling and detailed computational analysis is required using bioinformatics tools to get insights on infection mechanisms Bioinformatics methods are increasingly applied to analyze the increasing amount of experimentally found and computationally predicted PHI data

New Public Management in Africa Benon C. Basheka,Lukamba-Muhiya. Tshombe,2017-08-25 The administrative sciences have been dominated by a turn to managerial perspectives in the late 20th and early 21st centuries and in the spirit of this turn New Public Management or NPM promises to produce efficient responsible and client oriented public services The

reforms carried out in the pursuit of New Public Management are often accompanied by great optimism and rapid enthusiastic steps toward implementation Even in highly developed industrial countries however these fundamental reforms often overlook the political and cultural contexts of the implementing country New Public Management in Africa Emerging Issues and Lessons provides much needed theoretical foundations for NPM reforms in the African context and reflects on the success of existing reforms in the development of several African states The individual contributions in this timely volume provide important analyses of academic discourse practical policy achievements and desiderata The book as a whole however provides a valuable impetus for public administration research in and on African states sharing findings on the results of reforms to date and adjustments required for these reforms to succeed For public administration researchers outside of Africa this book offers a review of New Public Management case studies that are unavailable or difficult to find elsewhere contributing much to the exchange between African and Western administration science research and demonstrating that African administrative research is well prepared to help resolve global challenges

Oral Biofilms in Health and Disease Hyun (Michel) Koo, Nicholas S. Jakubovics, Bastiaan P. Krom, 2025-07-01 This book presents state of the art information on the fundamentals of oral biofilm formation The reader learns about adhesion and early colonization of polymicrobial communities the biochemistry and function of the oral biofilm matrix cooperative interactions as well as antagonism among microbes within oral biofilms The past decade has brought major technological advancements in molecular and microscopy technologies changing our understanding of oral biofilms in health and disease International experts comprehensively describe key strategies and techniques for studying oral biofilms in vitro ex vivo and in vivo including imaging model systems and omics approaches In addition the book provides an up to date overview of oral biofilms and associated diseases Innovative antibiofilm strategies are also addressed These span from eradication or modulation of oral biofilms as a prevention strategy and nonantibiotic or antibiotic supplementing approaches such as quorum sensing inhibition nanoparticles and pre and probiotics The book is a useful introduction to the field for early career scientists interested in basic and translational research on oral biofilms It is also an interesting read for advanced scientists and clinicians working in dentistry and oral health research as it gives them a broader view of the topic beyond their area of specialization

The Construction Precariat Selim Reza, 2020-07-28 Positioned within the discourse of neoliberalism and precarious work this book draws on Guy Standing's notion of the precariat in an examination of the role of recruiting individuals as the key actors in labour recruitment and management practices that produce precarious work conditions Based on extensive empirical work on migrant construction workers and their recruiters in Dhaka the capital of Bangladesh and one of the fastest growing cities in the world it explores the ways in which exploitative employment relationships contribute to various pressures and insecurities amongst migrant workers and limit the scope for labour protection Offering new insights into the field of labour migration by unpacking the interconnections between rural urban labour migration recruitment and precarious employment

The Construction Precariat conceptualises the domination of recruiters as producing hyper individualised employment and sheds light on the manner in which this relationship of domination and dependence contributes heavily both to the conditions of precariousness and to the control and exploitation of migrant workers
