Narrative, Literacy and Other Skills Edy Veneziano, Ageliki Nicolopoulou, 2019-05-15 In recent years narrative skills have been receiving increasing attention from researchers for their relevance in the development of language literacy and socio cognitive abilities This volume brings

together studies focusing on two key issues in the development of children's narrative skills. The first part of the Volume addresses the issue of the interrelatedness between narrative skills and literacy language and socio-cognitive development as well as of the impact of narrative practices on the promotion of these different skills. The second part of the Volume addresses the issue of how early interactional experiences, particular contextual settings and specific intervention procedures can help children promote their narrative skills. The studies span a wide age range from toddlers to late elementary school children, concern different languages (Dutch, English, French, German, Hebrew and Italian) and consider narrative skills and practices from a rich variety of theoretical and methodological approaches.

Development of Writing Skills in Children in Diverse Cultural Contexts Alina Galvão Spinillo, Carmen Sotomayor, 2023-06-16. This book brings together multiple theoretical perspectives and disciplinary approaches to study the acquisition and development of written language by children as well as the implications for teaching and learning of writing practices in a variety of languages and cultural contexts. Chapters in this contributed volume present both theoretical contributions and results of research carried out with students and teachers from 11 countries: Belgium, Brazil, Chile, Israel, Italy, Mexico, the Netherlands, Portugal, Spain, UK and USA who speak seven different languages: Portuguese, Spanish, English, Italian, French, Dutch and Hebrew. By bringing together research developed in diverse cultural contexts, it enriches the debates in the interdisciplinary field of writing studies by analyzing a wide range of topics at the interface between research and educational implications for the teaching and learning of writing by children. The book consists of five parts, each one addressing a specific set of topics. Part I presents studies on topics related to written language representation systems, phonological and morphological awareness and on the relationship between grammar and the quality of texts of different genres. Part II includes studies related to compositional processes of writing texts and the factors involved in these processes. Part III focuses on the difficulties faced by students during the acquisition and development of writing. Part IV is dedicated to chapters that discuss and compare writing practices in different social environments. Finally, chapters in part V deal with teaching and learning of writing in the school setting. **Development of Writing Skills in Children in Diverse Cultural Contexts: Contributions to Teaching and Learning** will be of interest to researchers and students in the fields of psychology, education and linguistics as well as to other social scientists in the broader interdisciplinary field of writing studies.
