influence of the European Court of Justice and European Court of Human Rights In the United States different standards of judicial review are applied to review arbitrary and capricious agency discretion However do US judges achieve a similar result to the proportionality or reasonableness test Drawing together a selection of key experts in the field this book analyses the principle of proportionality in the judicial review of administrative decisions from different perspectives The principle is first examined in the context of recent developments in the literature and case law including the inevitable EU influence then light shall be shed on the meaning of this principle in the specific case law of the European Court of Justice and European Court of Human Rights Finally the authors go on to explore the ways in which US judges consciously sanction the disproportionate and or unreasonable use of agency discretion In the legal systems where the proportionality test plays a very limited role Ranchord s and de Waard also try to clarify why this is the case and look at what alternative solutions have been found This book will be of great interest to scholars of public and administrative law and EU law
