### PRESENTATION

#### Factors influencing where people live

Activities and the environment influence the location. People live in areas where the factors are most favourable for human life.

#### Factors

Extension: How can we use this information to help us understand the world better?

### WORKSHEET

#### Global Population Distribution

Global population distribution shows where people live and how they live. It is influenced by many factors.

#### Population Density

- Population density is the number of people living in a given area.
- It is measured in people per square kilometre.
- It is calculated by dividing the total population by the total area.
- It is a measure of how crowded an area is.
- It is a measure of how many people live in a given area.

#### Population Density and Distribution

Some areas of the world are densely populated (crowded), while others are sparsely populated (empty). This is due to many factors.

Factors influencing where people live:

• Climate: Some areas are too hot or too cold for people to live in. Some areas are too dry or too wet.

• Relief: Some areas are too high or too low for people to live in. Some areas are too flat or too steep.

• Accessibility: Some areas are too far from other areas, making it difficult to travel to and from.
