Competency-Based Education in Aviation Suzanne K. Kearns, Timothy J. Mavin, Steven Hodge, 2017-05-15 Whether a trainee is studying air traffic control piloting maintenance engineering or cabin crew they must complete a set number of training hours before being licensed or certified The aviation industry is moving away from an hours based to a competency based training system Within this approach training is complete when a learner can demonstrate competent performance Training based on competency is an increasingly popular approach in aviation It allows for an alternate means of compliance with international regulations which can result in shorter and more efficient training programs However there are also challenges with a competency based approach The definition of competency based education can be confusing training can be reductionist and artificially simplistic professional interpretation of written competencies can vary between individuals and this approach can have a high administrative and regulatory burden *Competency Based Education in Aviation Exploring Alternate Training Pathways* explores this approach to training in great detail considering the four aviation professional groups of air traffic control pilots maintenance engineers and cabin crew Aviation training experts were interviewed and have contributed professional insights along with personal stories and anecdotes associated with competency based approaches in their fields Research based and practical strategies for the effective creation delivery and assessment of competency based education are described in detail *Aviation Maintenance Management* Frank H. King, 1986 This is a practical approach to and comprehensive examination of the problems that face the aviation supervisor The first chapter discusses the impact of population and geographic changes on the regulation of the airline industry Chapter 2 deals with The Federal Aviation Administration Chapter 3 with Regulatory Requirements and Chapter 4 with Organizational Structures Chapter 5 Management Responsibilities explores such practical aspects as directing programs leadership providing motivation and incentives and communication Chapter 6 Aviation Maintenance Procedures Chapter 7 Applications of Aviation Maintenance Concepts and Chapter 8 Budgeting Cost Controls and Cost Reduction also explore the daily problems of aviation supervision in practical terms Chapter 9 Training and Professional Development in Aviation Maintenance contains a discussion of certified aviation maintenance technical schools Chapter 10 is an in depth assessment of Safety and Maintenance Discussed here are safety in the maintenance hangar and on the ramp fueling aircraft electrical safety radiation concerns and building requirements Chapter 11 Electronic Data Processing covers the computer and applications of received data Chapter 12 Aviation Maintenance Management Problem Areas deals with matters ranging from parts ordering to administrative concerns The final chapter is a Forecast and Summary **Forensic Engineering** Kenneth L.
