Rogers' Theory on Science of Unitary Human Beings

Nursing theories form the foundation of nursing philosophy that guides nurses in the provision of quality patient care. Moreover, nurses have the professional obligation to systematically search scientific information as a basis for evidence on care delivery. Individual patient characteristics determine the course of care consistent with the nursing profession doctrine of patient-centered care. Nurses must possess analytical skills for critical evaluation of a patient's health status to inform clinical decision-making. However, nursing theories provide a framework that shapes the overall conduct of nurses in clinical practice. Therefore, the discussion of Martha Rogers'...

Kierkegaard's Influence on the Social Sciences Jon Bartley Stewart,2011 Kierkegaard has long been known as a philosopher and theologian but his contributions to psychology anthropology and sociology have also made an important impact on these fields The articles featured in the present volume explore the reception of Kierkegaard s thought in the social sciences Of these fields Kierkegaard is perhaps best known in psychology where The Concept of Anxiety and The Sickness unto Death have been the two most influential texts With regard to the field of sociology social criticism or social theory Kierkegaard s Literary Review of Two Ages has also been regarded as offering valuable insights about some important dynamics of modern society

Scripture and Scholarship in Early Modern England Nicholas Keene,2017-03-02 The Bible is the single most influential text in Western culture yet the history of biblical scholarship in early modern England has yet to be written There have been

many publications in the last quarter of a century on heterodoxy particularly concentrating on the emergence of new sects in the mid seventeenth century and the perceived onslaught on the clerical establishment by freethinkers and Deists in the late seventeenth and early eighteenth century However the study of orthodoxy has languished far behind This volume of complementary essays will be the first to embrace orthodox and heterodox treatments of scripture and in the process question challenge and redefine what historians mean when they use these terms The collection will dispel the myth that a critical engagement with sacred texts was the preserve of radical figures anti scripturists Quakers Deists and freethinkers For while the work of these people was significant it formed only part of a far broader debate incorporating figures from across the theological spectrum engaging in a shared discourse To explore this discourse scholars have been drawn together from across the fields of history theology and literary criticism Areas of investigation include the inspiration textual integrity and historicity of scriptural texts the relative authority of canon and apocrypha prophecy the comparative merits of texts in different ancient languages developing tools of critical scholarship utopian and moral interpretations of scripture and how scholars read the Bible Through a study of the interrelated themes of orthodoxy and heterodoxy print culture and the public sphere and the theory and practice of textual interpretation our understanding of the histories of religion theology scholarship and reading in seventeenth century England will be enhanced

Galvin - Economic Inequality and Energy Consumption in Developed Countries Ray Galvin, 2019-10-25 Inequality and Energy How Extremes of Wealth and Poverty in High Income Countries Affect CO2 Emissions and Access to Energy challenges energy consumption researchers in developed countries to reorient their research frameworks to include the effects of economic inequality within the scope of their investigations and calls for a new set of paradigms for energy consumption research The book explores concrete examples of energy deprivation due to inequality and provides conceptual tools to explore this in relation to other issues regarding energy consumption It thereby urges that energy consumption approaches be updated for a world of increasing inequality Extreme economic inequality has increased within developed countries over the past three decades The effects of inequality are now seen increasingly in health housing affordability crime and social cohesion There are signs it may even threaten democracy Researchers are also

exploring its effects on energy consumption One of their key findings is that less privileged groups have lost consistent access to basic energy services like warm homes and affordable transport leading to huge disparities of climate damaging emissions between rich and poor *Scholarship and Partisanship* Reinhard Bendix, Guenther Roth, 2023-04-28 Today Max Weber appears to many younger academic rebels as the patron saint of value neutral social science yet he too engaged in a furious generational rebellion of his own and in the end chose science as a vocation These essays deal with Weber's substantive and methodological contribution and the relation of his life to his place in intellectual and political history They examine the influences on Weber as well as his similarities to and differences from Marx Burckhardt Nietzsche Durkheim and others The authors also give attention to the ideological background of the modern attack upon the university and to comparative study of values authority and legitimation Bendix's Presidential Address to the 1970 meeting of the American Sociological Association is included This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1971 **New Writing Scholarship** Graeme Harper, 2025-02-12 This book provides engaging insights into the evolution and scope of the critical study of creative writing The wide range of chapters included reveals analyzes done as the field of Creative Writing Studies further emerged and grew across the world The book explores investigative methods and pedagogical thinking that has excitingly shaped and is shaping the critical and practice led study of creative writing particularly in higher education This volume is relevant for both students and scholars interested in creative writing particularly those who are interested in creative writing teaching and learning The chapters in the book were originally published as articles and editorials in the New Writing journal and are accompanied by a new Introduction and Conclusion and a Foreword by well known Creative Writing Studies scholar Dianne Donnelly **B. B. Warfield's Scientifically Constructive Theological Scholarship** David P. Smith, 2011-08-05 B B Warfield the Lion of Princeton is perhaps America's most prolific and preeminent biblical and theological scholar and yet he has been largely misunderstood and misrepresented In this landmark work David Smith penetrates to the defining features of Warfield's thought and helps us understand its revolutionary character Warfield's detractors have maligned his thought as static and beholden to an outdated epistemology yet Smith debunks this myth Placed within his historical context we discover Warfield expressing the organic and dynamic nature of truth overcoming the subject object dilemma that plagues Western epistemological rationalism and mysticism and all through his explaining the doctrinal system warranted by the Bible Theological scholarship and American church historiography will have to reckon with this fresh and much needed apologetic on America's preeminent apologist **Katherine Mansfield and Periodical Culture** Chris Mourant, 2018-11-23 This work considers Mansfield's ambivalent position as a colonial woman writer by examining her contributions to the political weekly

The New Age the avant garde little magazine Rhythm and the literary journal The Athenaeum Breaking Boundaries
 Nancy Calvert-Koyzis, Heather Weir, 2010-08-26 While people often believe that the feminist movements in Britain and North America began in the late twentieth century this is certainly not the case Women throughout the centuries have sought to break out of the constraints that their societies deemed appropriate for them For interpreters in the Christian tradition this often meant examining biblical texts that had been understood in ways that demeaned women and using their interpretations to encourage women to break out of their culturally proscribed spheres The essays in this volume are drawn from the Recovering Female Interpreters of the Bible Consultation at the SBL Annual Meeting and from sessions on female interpreters of Scripture at the Canadian Society of Biblical Studies The essays address female interpreters of the Bible such as Eudocia and Anna Jameson whose publications have been largely ignored in the fields of the history of biblical interpretation and reception history Through their publications these women used their interpretive and theological skills to break the boundaries that previous interpretations of the Bible and their societies imposed upon them **Shelley's Music**
 Paul A. Vatalaro, 2016-01-13 First published in 2009 This book argues that the images of and allusions to music in Shelley's writing demonstrate his attempt to infuse the traditionally masculine word with the traditionally feminine voice and music This further extends to his even more fundamental desire to integrate the object voice with his own subjectivity For Shelley what plagues this integration is the prospect of losing both the poet's authority and the subjectivity upon which it relies This book asserts that the resultant deadlock and instability paradoxically becomes Shelley's ultimate goal creating a steady state of suspension that finally preserves both his authority and his humanity **International Library of the Philosophy of Education**
 Charles Bailey, 2021-07-09 International Library of the Philosophy of Education reprints twenty four distinguished texts published in this field over the last half century and includes works by authors such as Reginald D Archambault Charles Bailey Robin Barrow Norman J Bull D E Cooper R F Dearden Kieran Egan D W Hamlyn Paul H Hirst Glenn Langford D J O Connor T W Moore D A Nyberg R W K Paterson R S Peters Kenneth A Strike I A Snook John and Patricia White and John Wilson Themes discussed include Liberal education moral education the aims of education the education of teachers adult continuing education and the philosophical analysis of education **Contemporary Newtonian Research** Z.
 Bechler, 2012-12-06 them in his cheat preface to Copernicus De Revolutionibus but the main change in their import has been that whereas Osiander defended Copernicus Mach and Duhem defended science The modern conception of hypothetico deductive science is again geared to defend the respectability of science in much the same way the physical interpretation it says is merely and always hypothetical and so the scientist is never really committed to it Hence when science sheds the physical interpretation off its mathematical skeleton as time and refutation catch up with it the scientist is not really caught in error for he never was committed to this interpretation in the first place This is the apologetic essence of present day Popper like versions of the idea of science as a mathematical core cum interpretational shell This is also Cohen's view for it

aims to free Newton of any existential commitment to which his theory might allegedly commit him It will be readily seen that Cohen regards this methodological distinction between mathematics and physics to be the backbone of the Newtonian revolution in science which is in its turn the climax of the whole Scientific Revolution for a very clear reason it enables us to argue that Newton could use freely the new concept of centripetal force even though he did not believe in physical action at a distance and could not conceive how such a force could act to produce its effects 3 pp **The International**
