Shirk, 2007-04-16 Once a sleeping giant China today is the world's fastest growing economy the leading manufacturer of cell phones laptop computers and digital cameras a dramatic turn around that alarms many Westerners But in China The Fragile Superpower Susan L Shirk opens up the black box of Chinese politics and finds that the real danger lies elsewhere not in China's astonishing growth but in the deep insecurity of its leaders China's leaders face a troubling paradox the more developed and prosperous the country becomes the more insecure and threatened they feel Shirk a former Deputy Assistant Secretary of State responsible for China knows many of today's Chinese rulers personally and has studied them for three decades She offers invaluable insight into how they think and what they fear In this revealing book readers see the world through the eyes of men like President Hu Jintao and former President Jiang Zemin We discover a fragile communist regime

desperate to survive in a society turned upside down by miraculous economic growth and a stunning new openness to the greater world. Indeed ever since the 1989 pro democracy protests in Tiananmen Square and the fall of communism in the Soviet Union Chinese leaders have been haunted by the fear that their days in power are numbered. There is a regime afraid of its own citizens and this fear motivates many of their decisions when dealing with the U S and other foreign nations. In particular the fervent nationalism of the Chinese people combined with their passionate resentment of Japan and attachment to Taiwan have made relations with these two regions a minefield. It is here Shirk concludes in the tangled interactions between Japan Taiwan China and the United States that the greatest danger lies. Shirk argues that rising powers such as China tend to provoke wars in large part because other countries mishandle them. Unless we understand China's brittle internal politics and the fears that motivate its leaders we face the very real possibility of avoidable conflict with China. This book provides that understanding.

Towards a Theory of Spacetime Theories Dennis Lehmkuhl, Gregor Schiemann, Erhard Scholz, 2017-01-05. This contributed volume is the result of a July 2010 workshop at the University of Wuppertal Interdisciplinary Centre for Science and Technology Studies which brought together world wide experts from physics philosophy and history in order to address a set of questions first posed in the 1950s. How do we compare spacetime theories? How do we judge objectively which is the best theory? Is there even a unique answer to this question? The goal of the workshop and of this book is to contribute to the development of a meta theory of spacetime theories. Such a meta theory would reveal insights about specific spacetime theories by distilling their essential similarities and differences, deliver a framework for a class of theories that could be helpful as a blueprint to build other meta theories and provide a higher level viewpoint for judging which theory most accurately describes nature. But rather than drawing a map in broad strokes the focus is on particularly rich regions in the space of spacetime theories. This work will be of interest to physicists as well as philosophers and historians of science working with or interested in General Relativity and or Space Time and Gravitation more generally.
