Carr,2024-10-16 This work first provides a general overview of the U S patent system covering such issues as the patent document and patent infringement The requirements of the invention and the conditions for patentability are discussed with a focus on the patent application and the approval process Major patent offices and international patent treaties are next examined providing a full description of both the U S and international patent and classification systems Methods for searching patent documents the requirements of a reference and general patent rights are discussed      Examination Manual for Patent and Utility Model in Japan Japan. Tokkyo-chō,1986      *International Patent Rights Harmonisation* Weinian Hu,2017-05-08 With reference to China this book examines the course of international patent rights harmonisation its characteristics as well as impediments It evaluates the case of China s patent law development over the course of the last three decades by drawing on the most up to date Chinese language sources In the process the volume focuses on China s patent legislation its achievements and weaknesses as well as the intrinsic limitations especially as far as enforcement is concerned The author pays close attention to the unique societal background in China a country that did not provide constitutional recognition to private property rights until 2004 and where a property law entered into force as late as 2013 30 years after the first promulgation of the patent law Global trade policy makers IP professionals and businesses will benefit from the insights presented by the chapters as they will help them to appreciate the achievements and the controversies pursuant to China s efforts in patent protection While serving as a useful case study for countries seeking to leverage patent protection as a driver for economic development the book will equally facilitate Chinese legislature to reflect on its patent legislation development specifically on legislative policy choices An additional analytical strength of the volume is that it compares the Chinese patent legislation with the American Invent's Act and the European Patent Convention It discovers the differences between the three patent legislations by using the minimum patent protection standards set down by the TRIPS Agreement as the benchmark The results of the comparisons suggest that China has successfully harmonised its patent legislation with the global patent protection system and often opts for higher patent protection standards The book also considers whether China could learn lessons from Japan and India in their respective patent legislation and policy choices With China undertaking a fourth patent law amendment the provisions contained in the second draft of the Patent Law 2015 which was published in December 2015 are included in the analysis      *Manual of Patent Examining Procedure* U.s.
