CHAPTER 11

SECTION 1: Basic Principles of Human Inheritance

As you read, underline important concepts and discuss them with your partner.

Use the terms defined throughout the passage. Write a definition for each term.

allele
An alternative form of a gene.

allele
An alternative form of a gene.

genotype
The genetic makeup of an individual.

phenotype
The observable characteristics of an individual.

1. **GENOTYPE** is the genetic makeup of an individual. It is determined by the combination of alleles inherited from both parents. The genotype is the genetic code that determines the individual's characteristics. It is the genetic information that is passed on from one generation to the next.

2. **PHENOTYPE** is the observable characteristics of an individual. It is determined by the genotype and the environment. The phenotype is the result of the interaction between the genotype and the environment. It is the physical expression of the genotype.

3. **ALLELE** is an alternative form of a gene. It is determined by the sequence of nucleotides in the DNA. There are two alleles for each gene: a dominant allele and a recessive allele.

As you read, underline important concepts and discuss them with your partner.

Mendelian Inheritance in Man Victor A. McKusick, 1998-06-29 The twelfth edition of this classic reference work includes More than 2 000 new entries A total of more than 9 000 entries New features and enhancement of the familiar old features Mapping information on more than 4 000 genes of known function Information on specific point mutations responsible for more than 700 genetic disorders or neoplasms Mendelian Inheritance in Man MIM is a genetic knowledgebase that serves clinical medicine and biomedical research including the Human Genome Project It aims to be comprehensive not only complete but also collated integrated and interpreted authoritative not only accurate but also sound in its interpretations and judgements and timely not only up to date but also historically dimensioned From a review of the eleventh edition Reproductive Toxicology Even the convenience of computer based forms of MIM cannot eliminate the need for MIM in book form The preface provides a wonderful synopsis of human genetics The information contained in this text serves as a concise review for those with a genetics background From a review of the tenth edition New England Journal of Medicine Victor McKusick has been for all these years the shepherd of the development of the field of clinical genetics

Perhaps his most important pragmatic achievement has been the 10 editions of Mendelian Inheritance in Man which rapidly became and has remained the principal source of information on inherited diseases for all clinical geneticists. In addition to the erudite entries in the books the references given with each description represent a magnificent bibliography of clinical genetics. With McKusick's leadership and continued interest in gene mapping the book also represents an important compendium of the location of genes on specific chromosomes. The book is a magnificent security blanket for the clinical geneticist and should be in the libraries not only of these specialists but also of all others who see patients with diseases that have genetic components.
