*Radical Victorians* James Hobson, 2022-06-20 There is more to the Victorian era than respectability economic success and the grudging solution of the practical social problems they encountered The politicians generals and

commercial classes have been well covered in popular history books but there were also thinkers of radical and unsettling ideas who had a real influence at the time. Many were women, many from the middle and working classes and almost all outside the power structure. They were by no means all fringe ideas either. In 1840 Queen Victoria herself attended a séance, for example. The book is a biography focussed history of some of these challenging ideas and the men and women who promoted them. It looks at radical thinkers and movers, the people who stepped outside of the social norm and propelled the Victorians towards the modern day.

**The Sentimental State** Elizabeth Garner Masarik, 2024-04-01

With *The Sentimental State* Elizabeth Garner Masarik shows how middle class women, both white and Black, harnessed the nineteenth century culture of sentiment to generate political action in the Progressive Era. While eighteenth century rationalism had relied upon the development of the analytic mind as the basis for acquiring truth, nineteenth century sentimentalism hinged upon human emotional responses and the public's capacity to feel sympathy to establish morally based truth and build support for improving the welfare of women and children. Sentimentalism marched right alongside women's steps into the public sphere of political action. The concerns over infant mortality and the fall of young women intertwined with sentimentalism to elicit public action in the formation of the American welfare state. The work of voluntary and paid female reformers during the late nineteenth and early twentieth centuries shaped what would become lasting collaborations between grassroots voluntary organizations and the national government. Women saw a social need, filled it, and cobbled together a network of voluntary organizations that tapped state funding and support when available. Their work provided safeguards for women and children and created a network of female-oriented programs that both aided and policed women of child-bearing age at the turn of the twentieth century. Through an examination of these reform programs, Masarik demonstrates the strong connection between nineteenth century sentimental culture and female political action advocating government support for infant and maternal welfare in the twentieth century.
