The Rise, the Fall, and the Recovery of Southeast Asia's Minidragons David Hollingsworth, 2008-01-01 This book explores how a clear eyed set of policies can govern a country's wellbeing from an economic standpoint and the vision it takes to propel a country to new heights The author considers not just development but how development was undone by policies and actions that were not governed by a consistent long range vision

The IMF and Recent Capital Account Crises Mr. Kevin Barnes, Mr. Ali M. Mansoor, Mr. Benjamin H. Cohen, Shinji Takagi, 2003-09-03 This report evaluates the role of the IMF in three capital account crises in Indonesia 1997-98 Korea 1997-98 and Brazil 1998-99 and the lessons to be drawn from the experience It also recommends steps aimed at making the IMF's surveillance and program design more effective in the prevention and management of future capital account crises Annexes contain the three country case studies that form the basis for the judgments for the report

The Holy Grail of Macroeconomics Richard C. Koo, 2011-11-21 The revised edition of this highly acclaimed work presents crucial lessons from Japan's recession that could aid the US and other economies as they struggle to recover from the current financial crisis This book is about Japan's 15 year long recession and how it affected current theoretical thinking about its causes and cures It has a detailed explanation on what happened to Japan but the discoveries made are so far reaching that a large portion of economics literature will have to be modified to accommodate another half to the macroeconomic spectrum of possibilities that conventional theorists have overlooked The author developed the idea of yin and yang business cycles where the conventional world of profit maximization is the yang and the world of balance sheet recession where companies are minimizing debt is the yin Once so divided many varied theories developed in macro economics since the 1930s can be nicely categorized into a single comprehensive theory The Holy Grail of Macro Economics
