

Fraction FEAST

Purpose

You will create plates with fractional portions of food on it. Then you will answer questions related to your planned meal.

Requirements

You must have the following in your planned meal:

FRACTIONS

- At least 1 ninth piece
- At least 1 eighth piece
- At least 1 equivalent fraction (labeled)
- The sum of all the fractions must equal one whole.
- Five different foods

Directions

1. You will need a meal plate and a dessert plate for your fraction feast meal.

2. Decide what "foods" you'd like to eat for your feast, keeping in mind the requirements.
3. Sketch out a plan for where each of your foods will go on your plate. Make sure your fractional pieces are created with accuracy. Remember that you cannot stack food on top of other food or draw it outside the plate lines.
4. Officially partition your plate for your foods. Remember to check that you have met all the requirements.
5. Label each fractional piece with the name of the food and the fraction. Then answer the questions provided.

Large-Scale Studies in Mathematics Education James A. Middleton,Jinfa Cai,Stephen Hwang,2015-05-05 In recent years funding agencies like the Institute of Educational Sciences and the National Science Foundation have increasingly emphasized large

scale studies with experimental and quasi experimental designs looking for objective truths Educational researchers have recently begun to use large scale studies to understand what really works from developing interventions to validation studies of the intervention and then to efficacy studies and the final scale up for large implementation of an intervention Moreover modeling student learning developmentally taking into account cohort factors issues of socioeconomics local political context and the presence or absence of interventions requires the use of large data sets wherein these variables can be sampled adequately and inferences made Inroads in quantitative methods have been made in the psychometric and sociometric literatures but these methods are not yet common knowledge in the mathematics education community In fact currently there is no volume devoted to discussion of issues related to large scale studies and to report findings from them This volume is unique as it directly discusses methodological issue in large scale studies and reports empirical data from large scale studies
