including pilot's notes and other Air Ministry publications to provide a unique guide to this iconic aircraft. The Hawker Hurricane was a British single seat fighter aircraft that was designed and predominantly built by Hawker Aircraft Ltd for the RAF. Although overshadowed by the Spitfire during the Battle of Britain, the Hurricane accounted for 60% of the RAF's air victories in the battle and served in all the major theatres of the Second World War. The 1930s design evolved through several versions and adaptations, resulting in a series of aircraft that acted as interceptor fighters, fighter bombers also called Hurribombers, and ground support aircraft. Further versions known as the Sea Hurricane had modifications that enabled operation from ships. Some were converted as catapult launched convoy escorts known as Hurricats. More than 14,583 Hurricanes were built by the end of 1944, including at least 800 converted to Sea Hurricanes and some 1,400 built in Canada. The book collates a variety of pamphlets and manuals on the plane that were produced throughout the war for the benefit of pilots and others associated with the aircraft.

The Bombing War Richard Overy, 2013-09-26

The ultimate history of the Blitz and bombing in the Second World War from Wolfson Prize winning historian and author Richard Overy. The use of massive fleets of bombers to kill and terrorize civilians was an aspect of the Second World War which continues to challenge the idea that Allies specifically fought a moral war. For Britain, bombing became perhaps its principal contribution to the fighting, as night after night exceptionally brave men flew over occupied Europe, destroying its cities. *The Bombing War* radically overhauls our understanding of the War. It is the first book to examine seriously not just the most well known parts of the campaign but the significance of bombing on many other fronts: the German use of bombers on the Eastern Front, for example, as well as much newly discovered material on the more familiar Blitz on Britain or the Allied campaigns against Italian cities. The result is the author's masterpiece: a rich, gripping picture of the Second World War and the terrible military, technological, and ethical issues that relentlessly drove all its participants into an abyss.

Reviews

Magnificent must now be regarded as the standard work on the bombing war. It is probably the most important book published on the history of the second world war this century. **Richard J. Evans**, *Guardian*

Monumental this is a major contribution to one of the most controversial aspects of the Second World War, full of new detail and perspectives, hugely impressive. **James Holland**, *Literary Review*

This tremendous book does what the war it describes signally failed to do. With a well thought out strategy and precision, it delivers maximum force on its objectives. The result is a masterpiece of the historian's art. **The Times**

It is unlikely that a work of this scale, scope, and merit will be surpassed. **Times Higher Education**

What distinguishes Mr Overy's account of the bombing war from lesser efforts is the wealth of narrative detail and analytical rigour that he brings to bear. **Economist**

Excellent Overy is never less than an erudite and clear-eyed guide whose research is impeccable and whose conclusions appear sensible and convincing even when they run against the established trends. **Financial Times**

Hard to surpass If you want to know how bombing worked, what it did, and what it meant, this is the book to read. **Times Literary Supplement**

aircraft and pilotless target aircraft together with many designs that were ordered but not built so that the importance placed on them by the Naval Staff or their potential technological impact on carrier design and operations can be explained. Every type even unsuccessful single prototypes is described the majority are illustrated by photographs many of which come from the author's own collection and the fifty most significant aircraft have detailed drawings. The Australian and Canadian Fleet Air Arms operated RN aircraft types for many years after their formation and these are included together with other types they have operated subsequently to give a more complete overview. The book describes over 400 different types of aircraft built by over 100 different manufacturers to offer the most detailed coverage of RN aircraft ever produced. Research for the book took over forty years and reference material included Admiralty Archives and an array of material in the public domain including manufacturers data individual aircraft pilot's notes and a wealth of published sources. David Hobbs is uniquely well placed to write this book having served in the RN for thirty three years and retired with the rank of Commander. He flew both fixed and rotary wing aircraft and his log book contains 2300 flying hours with 807 day and night deck landings. He served in seven British aircraft carriers and spent four years within RN Director General Aircraft Department where he was closely involved with Sea Harrier carrier trials and introduced new visual landing aids for night recoveries and liaised with the USN on carrier operating techniques. This is his eleventh book for Seaforth Publishing.
