

Question:

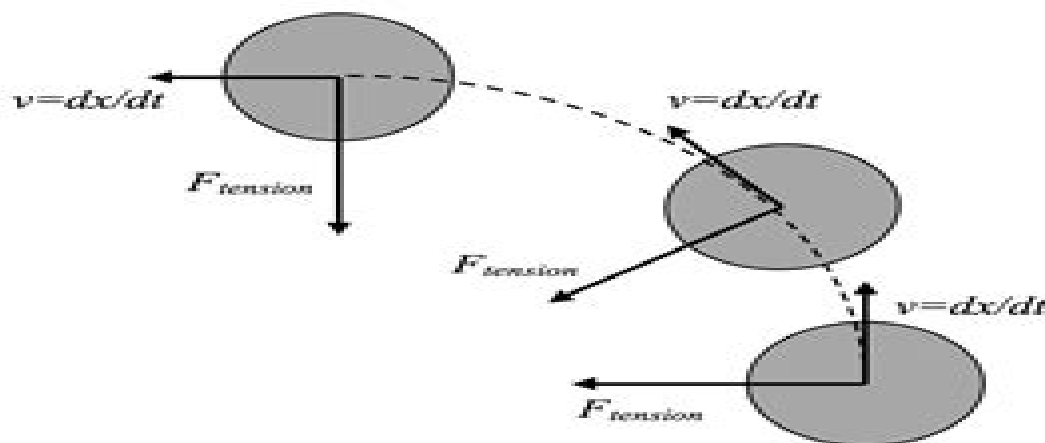

A disk of mass m is placed on a frictionless table, and attached to a vertically-hanging mass M by a string that passes through a frictionless opening in the surface. The disk has a speed v as it travels in a circle with a constant radius R . How much work is done on the disk in one half revolution?

- $Mg \cdot \pi R$
- $mg \cdot \pi R$
- $Mg \cdot \frac{1}{2} \pi R^2$
- $Mg \cdot 2R$
- none of these

©2009, Richard White. LearnAPphysics.com

Answer:

The correct answer is *e*. $W = F \cdot x$, so $W = Fx \cos \theta$. *Zero* work is done on the disk because there are no forces acting in the direction of displacement (Δx), ie. F and Δx are perpendicular to each other for all forces. The force of gravity (weight) and the normal force act vertically while the disk is moving horizontally, so no work is done by them. The centripetal force due to the tension in the string acts perpendicular to the motion of the disk as the disk moves in a circle, so no work is done by the tension either.

Rotational Motion Physics Sample Questions

S Ashworth

Rotational Motion Physics Sample Questions:

This is likewise one of the factors by obtaining the soft documents of this **Rotational Motion Physics Sample Questions** by online. You might not require more period to spend to go to the ebook inauguration as capably as search for them. In some cases, you likewise realize not discover the publication Rotational Motion Physics Sample Questions that you are looking for. It will utterly squander the time.

However below, taking into consideration you visit this web page, it will be hence definitely simple to get as well as download guide Rotational Motion Physics Sample Questions

It will not take on many grow old as we explain before. You can reach it even though take action something else at home and even in your workplace. fittingly easy! So, are you question? Just exercise just what we manage to pay for below as competently as evaluation **Rotational Motion Physics Sample Questions** what you subsequent to to read!
