Marketplace Trade and West African Urban Development Krys Ochia, 2022-01-01 This book analyses how informal economy traders and the marketplace institution dominate the local economy in African cities According to the World Bank being an African reduces the probability that an individual is an entrepreneur in the manufacturing sector by more than 95 percent Exporting unprocessed strategic raw materials and importing large volumes of finished goods stagnate Africa's informal sector while creating formal jobs overseas This suggests employment increases in distributive trade and persistence of the marketplace institution in reducing urban unemployment and income inequality However there is limited knowledge of the men and women with permanent stalls in large urban marketplaces that function daily as a temporary city

within a city even though they are the major actors in distribute trade More important their daily out of stall contacts resulting from maintaining complex social and economic relationships that determine the financial health of family business and the economy are generally unexplored and largely unknown but have significant unintended consequences on the urban mobility system Researchers planners development practitioners and policymakers have therefore not focused their attention and considered the impacts of the powerful economic institution marketplaces and traders in framing transport planning processes and urban development policies and that is the paradox surrounding marketplace trade and urban development in West Africa
