Polymerase Chain Reaction

Synopsis

In this Polymerase Chain Reaction (PCR) simulation, you will see through eight steps another modern way for to amplify that target DNA. In this virtual experiment, you will find out how to perform PCR and explain it in the form of the laboratory report format of their page.

Design and

After sampling, you will go to the PCR laboratory. In this step, the samples of DNA you collected by using a microchip is thermocycling, and this amplification from the initial source. It is up to you to make the correct samples accurately the PCR experiment.

How the structure of DNA results explanation is offered

In the simulation, you will find that PCR experiment on the computer lab. Illustrating the structure of DNA and the explanation that includes all the correct information the experimental process, as well as all specifications of the PCR itself.

Identify the materials
