for Web based development and of course the Oracle database itself Built in packages extend the capabilities and power of PL SQL in many significant ways For example DBMS_SQL executes dynamically constructed SQL statements and PL SQL blocks of code DBMS_PIPE communicates between different Oracle sessions through a pipe in the RDBMS shared memory DBMS_JOB submits and manages regularly scheduled jobs for execution inside the database DBMS_LOB accesses and manipulates Oracle8 s large objects LOBs from within PL SQL programs The book shows how to call all of the commonly used built in functions and packages For packages it also shows the RESTRICT REFERENCES pragmas needed if you call packages from a SQL statement as well as the exceptions constants and data structures defined in the packages
