Learning Outcomes

- ▶ Name the human organ systems, and indicate the major functions of each.
- ▶ List several major organs of each system, and identify them in a dissected rat, human cadaver or cadaver image, or a dissectible human torso model.
- ▶ Name the correct organ system for each organ when presented with a list of organs.

Pre-Lab Quiz

Instructors may assign these and other Pre-Lab Quiz questions using **Mastering A&P™**.

1. Name the structural and functional unit of all living things.
2. The small intestine is an example of a(n) _____ because it is composed of two or more tissue types that perform a particular function for the body.
 - a. epithelial tissue
 - b. muscular tissue
 - c. organ
 - d. organ system
3. The _____ system is responsible for maintaining homeostasis of the body via rapid transmission of electrical signals.
4. The kidneys are part of the _____ system.
5. The thin muscle that separates the thoracic and abdominal cavities is the _____.

The basic unit of life is the **cell**. Cells fall into four different categories according to their structures and functions. These categories correspond to the four primary tissue types: epithelial, muscular, nervous, and connective. A **tissue** is a group of cells that are similar in structure and function. An **organ** is a structure composed of two or more tissue types that performs a specific function for the body.

An **organ system** is a group of organs that act together to perform a particular body function. For example, the organs of the digestive system work together to break down foods and absorb the end products into the bloodstream in order to provide nutrients and fuel for all the body's cells. In all, there are 11 organ systems, described in **Table 1**.

Read through this summary of the body's organ systems (**Table 1**) before beginning your rat dissection or examination of the predissected human cadaver. If a human cadaver is not available, Figures 3 to 6 will serve as a partial replacement.

Go to **Mastering A&P™** > Study Area to improve your performance in A&P Lab.

> Lab Tools > Practice Anatomy Lab > Anatomical Models

Instructors may assign new Building Vocabulary coaching activities, Pre-Lab Quiz questions, Art Labeling activities, Practice Anatomy Lab Practical questions (PAL), and more using the **Mastering A&P™** Item Library.
