

	Ineffective	Developing	Effective	Highly Effective
Competency 3d Using Assessment in Instruction	There is little or no assessment or monitoring of student learning; feedback is absent, or of poor quality. Students do not appear to be aware of the assessment criteria and do not engage in self-assessment.	Assessment is used sporadically to support instruction, through some monitoring of progress of learning by teacher and/or students. Feedback to students is general, and students appear to be only partially aware of the assessment criteria used to evaluate their work. Questions/prompts/assessments are rarely used to diagnose evidence of learning.	Assessment is regularly used during instruction, through monitoring of progress of learning by teacher and/or students, resulting in accurate, specific feedback that advances learning. Students appear to be aware of the assessment criteria; some of them engage in self-assessment. Questions/prompts/assessments are used to diagnose evidence of learning.	Assessment is fully integrated into instruction, through extensive use of formative assessment. Students appear to be aware of, and there is some evidence that they have contributed to, the assessment criteria. Students self-assess and monitor their progress. A variety of feedback, from both the teacher and peers, is accurate, specific, and advances learning. Questions/prompts/assessments are used regularly to diagnose evidence of learning by individual students.
Critical Attributes	• The teacher gives no indication of what high-quality work looks like. • The teacher makes no effort to determine whether students understand the lesson. • Feedback is only global. • The teacher does not ask students to evaluate their own or classmates' work.	• There is little evidence that the students understand how their work will be evaluated. • Teacher monitors understanding through a single method, or without eliciting evidence of understanding from all students. • Teacher requests global indications of student understanding. • Feedback to students is not uniformly specific; not oriented towards future improvement of work. • The teacher makes only minor attempts to engage students in self- or peer-assessment. • The teacher's attempts to adjust the lesson are partially successful.	• Students indicate that they clearly understand the characteristics of high-quality work. • The teacher elicits evidence of student understanding during the lesson. • Students are invited to assess their own work and make improvements. • Feedback includes specific and timely guidance for at least groups of students. • The teacher attempts to engage students in self- or peer-assessment. • When necessary, the teacher makes adjustments to the lesson to enhance understanding by groups of students.	In addition to the characteristics of "Effective," • There is evidence that students have helped establish the evaluation criteria. • Teacher monitoring of student understanding is sophisticated and continuous: the teacher is constantly "taking the pulse" of the class. • Teacher makes frequent use of strategies to elicit information about individual student understanding. • Feedback to students is specific and timely, and is provided from many sources, including other students. • Students monitor their own understanding, either on their own initiative or as a result of tasks set by the teacher. • The teacher's adjustments to the lesson are designed to assist individual students.
Possible Examples	• A student asks: "How is this assignment going to be graded?" • A student asks: "Does this quiz count towards my grade?" • The teacher forges ahead with a presentation without checking for understanding. • The teacher says: "good job, everyone."	• Teacher asks: "Does anyone have a question?" • When a student completes a problem on the board, the teacher corrects the student's work without explaining why. • The teacher, after receiving a correct response from one student, continues, without ascertaining whether all students understand the concept.	• The teacher circulates during small group or independent work, offering suggestions to groups of students. • The teacher uses a specifically-formulated question to elicit evidence of student understanding. • The teacher asks students to look over their papers to correct their errors.	• The teacher reminds students of the characteristics of high-quality work (the assessment criteria), suggesting that the students themselves helped develop them. • While students are working, the teacher circulates providing substantive feedback to individual students. • The teacher uses popcicle sticks or exit tickets to elicit evidence of individual student understanding. • Students offer feedback to their classmates on their work. • Students evaluate a piece of their writing against the writing rubric and confer with the teacher about how it could be improved.

Sample Smart Goals Danielson

Victor M. Corman

Sample Smart Goals Danielson:

10 Models of Teacher Evaluation David Silverberg, Linda Jungwirth, 2014-02-04 For the first time school districts around the country are being required to adopt formal accountability measures to assess teacher effectiveness In a radical shift teacher quality will be based on outputs student achievement teacher observations rather than inputs years of service degrees attained This change in school culture and practice is an attempt to improve everything from individual student learning to national economic competitiveness It also requires that administrators implement new and rigorous teacher evaluation programs that align with state and federal guidelines Busy administrators lack the training and experience necessary to quickly and efficiently craft a teacher evaluation system that successfully meets the needs of their district Questions like What is the best program for my district or How do I get the teachers on board are being asked by school leaders across the country This book provides real world answers by highlighting 10 diverse model programs from around the country

2.5 writing equations of lines mathematics libretexts - Feb 12 2023

web sep 27 2020 the given line is written in $mx + b$ the slope is 2 to find the slope of a perpendicular line find the reciprocal $-\frac{1}{2}$ the slope of the perpendicular line is $-\frac{1}{2}$ use the method for writing an equation from the slope and a point on the line substitute 1.5 for x and y $mx + b = 1.5(-\frac{1}{2}) + b$

1.5 equations of lines mathematics libretexts - Jan 11 2023

web feb 26 2021 to find the equation of the line pictured in figure page index 2 select an arbitrary point $Q(x, y)$ on the line then compute the slope of the line using $\left(x_1, y_1 \right)$ and $\left(x_2, y_2 \right)$ in the slope formula 1 text slope $\frac{y_2 - y_1}{x_2 - x_1}$ nonnumber

10.2 points lines and planes mathematics libretexts - Jul 17 2023

web jun 5 2023 after completing this section you should be able to identify and describe points lines and planes express points and lines using proper notation determine union and intersection of sets in this section we will begin our exploration

of geometry by looking at the basic definitions as defined by euclid

points and lines definition and examples byju s - Jan 31 2022

web math article points and lines points and lines in geometry points and lines are the fundamental concepts that we need to learn before we learn about different shapes and sizes a point is a dimensionless shape since it represents a dot only whereas a line is a one dimensional shape

points lines and planes geometry practice khan academy - Apr 14 2023

web learn for free about math art computer programming economics physics chemistry biology medicine finance history and more khan academy is a nonprofit with the mission of providing a free world class education for anyone anywhere

forms of linear equations review article khan academy - Apr 02 2022

web find the equation of the line in all three forms listed above two of the forms require slope so let's find that first slope $m = \frac{\Delta y}{\Delta x} = \frac{5 - 4}{5 - 2} = \frac{1}{3}$ now we can plug in m and one of the points say $(5, 5)$ to get point slope form $y - y_1 = m(x - x_1)$

linear equations functions graphs khan academy - Sep 07 2022

web this topic covers intercepts of linear equations functions slope of linear equations functions slope intercept point slope standard forms graphing linear equations functions writing linear equations functions interpreting linear equations functions linear equations functions word problems

find the equation with a point and slope mathway - Jul 05 2022

web step 1 enter the point and slope that you want to find the equation for into the editor the equation point slope calculator will find an equation in either slope intercept form or point slope form when given a point and a slope the calculator also has the ability to provide step by step solutions step 2 click the blue arrow to submit

desmos graphing calculator - May 15 2023

web explore math with our beautiful free online graphing calculator graph functions plot points visualize algebraic equations add sliders animate graphs and more

equation of a straight line math is fun - Mar 01 2022

web what is the equation for a vertical line the slope is undefined and where does it cross the y axis in fact this is a special case and we use a different equation not y but instead we use x like this $x = 1.5$ every point on the line has x coordinate 1.5 that is why its equation is $x = 1.5$
