SharePoint

SharePoint is a web-based collaboration tool that allows groups of colleagues to manage and edit a wide range of shared content (such as documents, lists and calendars) in secure team sites. Sites can be created either for temporary, short-term projects, or as permanent locations for shared content. With Office 365, you can upload or create and save new documents to Team Sites using both the client version of Microsoft Word, PowerPoint and Excel, or the new Office Online apps. The Office Online apps offer the added bonus of allowing you to view and make simple changes to documents from any computer with an Internet connection, which is helpful when you don't have access to the client version of Office.
