[An Essential Guide to Hearing and Balance Disorders](#) R. Steven Ackley, T. Newell Decker, Charles J. Limb, 2018-03-29 An Essential Guide to Hearing and Balance Disorders consolidates the most significant clinical aspects of hearing and balance disorders ranging from cause and diagnosis to treatment and cure. Experts in various subspecialties of this extensive topic introduce readers to the most sophisticated and state of the art methods of diagnosis and treatment. Each chapter expands on a specific topic area along the continuum of how medical personnel diagnose hearing and balance disorders to how surgical implantation of the cochlea and rehabilitation can remedy various conditions. In concise format the book begins with a case history and follows with comprehensive descriptions of current knowledge regarding fundamental causes of hearing loss and balance disorders as well as a thorough examination of objective assessment. The latter half of the volume presents specialized treatment and rehabilitative options for various disorders. The chapters in this part cover special topics and conclude with pertinent case studies. Unique areas of discussion in a text of this kind include genetics of deafness, pediatric hearing loss and hearing loss later in life, business essentials in audiology, private practice, professional issues such as ethics, methods of practice and conflicts of interest. As its title implies, this book is critically important for all students and professionals in hearing balance related disciplines including audiology, otolaryngology, general medicine and rehabilitation oriented allied health care occupations.

Management and Minimisation of Uncertainties and Errors in Numerical Aerodynamics Bernhard Eisfeld, Holger Barnewitz, Willy Fritz, Frank Thiele, 2013-02-11 This volume reports results from the German research initiative MUNA (Management and Minimization of Errors and Uncertainties in Numerical Aerodynamics) which combined development

activities of the German Aerospace Center DLR German universities and German aircraft industry The main objective of this five year project was the development of methods and procedures aiming at reducing various types of uncertainties that are typical of numerical flow simulations The activities were focused on methods for grid manipulation techniques for increasing the simulation accuracy sensors for turbulence modelling methods for handling uncertainties of the geometry and grid deformation as well as stochastic methods for quantifying aleatoric uncertainties

The Arterial System R.D. Bauer, R. Busse, 2012-12-06 This book summarizes the papers presented at the symposium Dynamics and Regulation of the Arterial System held at Erlangen on 28 30 October 1977 in honor of Professor Erik Wetterer The aim of the symposium was an intensive exchange of ideas within a multidisciplinary group of scientists who are specialists in their fields of research It is obvious that a two day symposium covering such a wide range of topics could only highlight certain aspects of the latest research on the cardiovascular system The book is divided into three sections The first part deals with arterial hemodynamics Emphasized are the mechanical properties of the arterial wall in particular the smooth muscle fundamental parameters for the description of pulse wave propagation such as attenuation phase velocity and reflection of pulse waves Furthermore new methods for recording arterial diameters and the latest results in determining pulsatile pressure and pulsatile diameter of arteries in vivo as well as from calculations based on models of the arterial system are presented The second part deals with applications of the control theory and the principles of optimality of the cardiovascular system in toto and of single regions of this system Contributions to research in the field of regulation of blood volume and of regional hemodynamics are also presented The third part covers problems of interaction of the heart and the arterial system including fluid mechanics of the aortic valves and the coronary blood flow under normal and pathologic conditions
