**Advanced PHP and OpenERP / Odoo 7 Interfacing** Akhmad Daniel Sembiring, Versi PDF atau Pembayaran Lewat Paypal BCA Mandiri disini <http://shop.vitraining.co> OpenERP Odoo provides an application programming interface using it's XML RPC webservice. The service is ready to be accessed by any programming language that is capable on communication through XML RPC interface. This book explains in details on how to setup, configure and do the integration of external system into OpenERP Odoo. Started with the OpenERP installation steps both for Linux and Windows then PHP XAMPP installation for both operating systems and the required preparation steps to take in order that the systems are ready to be integrated together. Taking PHP as the interfacing scripting language using it's XML RPC library, this book explains how to create a PHP class that contains methods for login, search, read, create, delete and update data stored on OpenERP. Then how to use that class for real life example on accessing a legacy MySQL database and importing the data into OpenERP and managing the status of already imported data. PHP provides a wide variety of object oriented frameworks so this book also explains on how to use the class from inside a PHP framework taking Yii Framework as an example. At the end of the topics it's explained on how to automate the integration process periodically. In Linux we utilize the cron job and in Windows we use the Task Scheduler. The book is live downloadable and purchasable from Google Play store but you can also purchase it directly from <http://vitraining.com> shop where payment can be made in local Indonesian bank.
