

The Opening Session

Conference Chairman: Jean E. Sammet
Keynote Speaker: Grace Murray Hopper

CONFERENCE CHAIRMAN'S OPENING REMARKS

JEAN E. SAMMET: I'm happy to have this opportunity to open this Conference on the History of Programming Languages. It's something that I personally have been thinking about for almost seven years although the actual work on this has only been going on for the past one-and-a-half years. Most of you have not had the opportunity to look at the Preprints, and perhaps you haven't had too much time to even look at the program. For that reason I want to make sure that you understand something about what *is* intended, and frankly what is *not* intended be done in this conference. We view this as a start: perhaps the first of a number of conferences which will be held about various aspects of the computing field in general, software in particular, and even more specifically, programming languages. We hope that this conference and the Preprints and the final proceedings will stimulate many older people, many younger people, and many of those in the in-between category in the field to do work in history.

This conference, I repeat again, is certainly not the last set of words to be held on this subject. It's only a beginning. I want to emphasize also that it's *not* a conference on the entire history of programming languages, nor even on the entire history of the languages that we selected. As many of you have seen from some of the earlier publicity that we put out, we're trying to consider and report on the technical factors which influenced the development of languages which satisfied a number of criteria. First, they were created and in use by 1967; they remain in use in 1977, which is when we made the decisions; and they've had considerable influence on the field of computing. The criteria for choosing a language include the following factors, although not every factor applied to each language: we considered usage, influence on language design, overall impact on the environment, novelty, and uniqueness. Particularly because of the cut-off date of 1967, some languages which are in common use today are not included. We definitely wanted a perspective of 10 years before we started worrying about the early history of the language.

Furthermore, we made a very early decision, almost automatically, that this conference would be based on invited speakers for selected languages and not on contributed papers.
