**5. Scientific Writing - State Test Sample Question (CER):**

Information: Only four planets in our solar system are made of rock, Mercury, Venus, Earth, and Mars. Temperatures on Mercury and Venus are over 800-degrees Fahrenheit, while Mars sits around negative 100-degrees Fahrenheit. Mercury and Mars have no suitable atmosphere to breathe, while Venus holds an atmosphere so thick in carbon dioxide it would kill humans. The other 4 planets, Jupiter, Saturn, Uranus, and Neptune, are made of gas and cannot support land dwelling.

Question: Humans need a habitable planet besides Earth for survival which planet would the most suitable for humans to live in space? Justify your answer. (4 POINTS) Answer the question in a structured way. Information/Reasons/your claim/ if INFORMATION is appropriate that evidence, including any the other planets are not chosen.

- *There is none to be the most suitable backup planet for humans if we had to leave Earth.*
- *There is made of rock like Earth, so we could build. There is cold, but humans survive in a wider temperature on Earth of -50-degrees Fahrenheit. There has no atmosphere, but humans can wear oxygen masks to breathe easily.*
- *Mercury and Venus are too hot and would kill humans, so we cannot use them for backup. The gas planets have no surface so we cannot use them for backup. There is the only available option for a backup planet.*

Hanlon, 2016-04-30 Considering questions such as Where did language come from and Do animals know they exist Michael Hanlon explores possible theories and dispatches a few of the less likely ones in his quest to fill the gaping holes that science is littered with **Technical Paper** ,1968 *The Key to Theosophy* Helena Petrovna Blavatsky, 1889 Lucid Waking: The Answer to the Problem of Consciousness Jack Tanner, 2021-07-27 There is no problem more baffling to the academic world than the problem of consciousness It s fair to say that no academic has any clue at all about what consciousness is In fact academics have totally confused it with something radically different namely sentience The problem that faces the academic world is the insurmountable one of how you get lifeless mindless purposeless objects material atoms to manifest subjectivity It s a category error to imagine that matter can provide any answers to the foundational issues of mind Academics believe that to answer the problem of subjectivity is thereby to solve the hard problem of consciousness In fact the problem of subjectivity sentience is totally different from the problem of consciousness To understand why simply ponder all of the following statements 1 animals are sentient but not conscious 2 human babies are sentient but not conscious 3 humans who never encountered another human are sentient but not conscious 4 sleepwalking humans are sentient but not conscious The problem of sentience is drastically different from the problem of consciousness and if you conflate the two you have immediately set yourself an impossible task especially if you make any attempt to solve these problems within the framework of materialism i e the ideology of anti mind To understand what consciousness actually is it s essential to understand the difference in the world of sleep between dreaming and lucid dreaming Exactly the same dichotomy is present in the waking world A sleepwalker is a person who can do complex tasks such as riding a motorbike for half an hour without any consciousness A conscious version of a sleepwalker engages in what we refer to as lucid waking Lucid waking is the key to consciousness The fact is that consciousness is not an inherent property of human individuals It s not built into them It s acquired just as some people acquire the ability to become lucid dreamers Since sleepwalkers could

do many of the same things as conscious individuals the question is invited of why consciousness is required at all If you don't know what consciousness is how can you expand your consciousness to the maximum Wouldn't you like to be maximally conscious Think of the power you would have
