Practice Manual Ca Final 2013:

The Microbiological Safety of Low Water Activity Foods and Spices Joshua B. Gurtler, Michael P. Doyle, Jeffrey L. Kornacki, 2014-12-08 Low water activity aw and dried foods such as dried dairy and meat products grain based and dried ready to eat cereal products powdered infant formula peanut and nut pastes as well as flours and meals have increasingly been associated with product recalls and foodborne outbreaks due to contamination by pathogens such as Salmonella spp and enterohemorrhagic E coli In particular recent foodborne outbreaks and product recalls related to Salmonella contaminated spices have raised the level of public health concern for spices as agents of foodborne illnesses Presently most spices are grown outside the U S mainly in 8 countries India Indonesia China Brazil Peru Madagascar Mexico and Vietnam Many of these countries are under developed and spices are harvested and stored with little heed to sanitation The FDA has regulatory oversight of spices in the United States however the agency s control is largely limited to enforcing regulatory compliance through sampling and testing only after imported foodstuffs have crossed the U S border Unfortunately statistical sampling plans are inefficient tools for ensuring total food safety As a result the development and use of decontamination treatments is key This book provides an understanding of the microbial challenges to the safety of low aw foods and a historic backdrop to the paradigm shift now highlighting low aw foods as vehicles for foodborne pathogens Up to date facts and figures of foodborne illness outbreaks and product recalls are included Special attention is given to the uncanny ability of Salmonella to persist under dry conditions in food processing plants and foods A section is dedicated specifically to processing plant investigations providing practical approaches to determining sources of persistent bacterial strains in the industrial food processing environment Readers are guided through dry cleaning wet cleaning and alternatives to processing plant hygiene and sanitation Separate chapters are devoted to low aw food commodities of interest including spices dried dairy based products low aw meat products dried ready to eat cereal products powdered infant formula nuts and nut pastes flours and meals chocolate and confectionary dried teas and herbs and pet foods The book provides regulatory testing guidelines and recommendations as well as guidance through methodological and sampling challenges to testing spices and low aw foods for the presence of foodborne pathogens Chapters also address decontamination processes for low aw foods including heat steam irradiation microwave and alternative energy based treatments

Contesting Public Spaces Ed Wall, 2022-06-01 This book explores concerns for spatial justice as streets squares and neighbourhoods are continuously made and remade through planning processes political ambitions and everyday activities By investigating three sites in London that have been the focus of masterplanning Ed Wall exposes conflicts between planning offices and private developers who direct large urban change and community groups market traders and residents whose public lives are inseparable from their neighbourhoods being reconfigured The book uniquely brings sociological approaches to what are often considered architectural concerns revealing challenges as London s public spaces are designed regulated and lived

Through in depth research Ed Wall identifies how uncertainty caused by large scale urban strategies the realisation of visual priorities and uneven relations between private interests public organisations and daily lives determine the public realm of global cities This work is intended for readers interested in how the urban spaces of their cities are continually produced in competing ways from architecture and urban studies scholars to planners and politicians
