

All of the following reactions involve at least one pericyclic process (a number of the problems involve multiple pericyclic processes).

In each case:

- provide a mechanism for the reactions
- identify the pericyclic process or processes
- assign them to their class
- show they are allowed using either the Woodward-Hoffmann rules or an FMO analysis
- Predict the stereochemical outcome of the reaction where it is not shown (wavy bond) or rationalise the stereochemical outcome where it is shown.
